Introducing our...

Smallest,

Most Versatile,

Most Advanced,

...Servo Drives to date!

Growing doesn't always mean getting bigger.

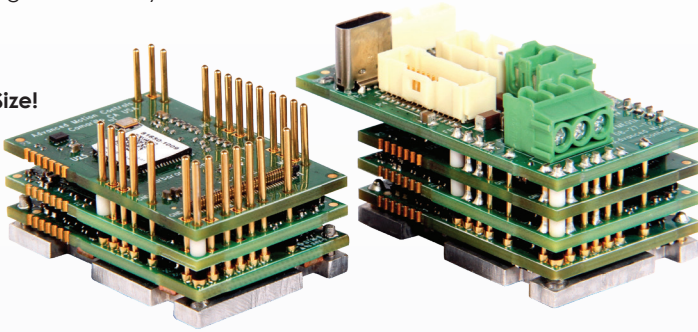

We're in a new era of motion control where advancements in robots and automation are accelerating at a rapid pace.

There is a growing demand for smaller, more versatile, and higher power servo drives that are designed to easily integrate into ever-tightening constraints.

We have accepted the challenge and answered the call!

Introducing a new family of drives, FlexPro™.

Actual Size!

PCB Mount

w/ Interface Board

Specifications

	Fx060-25-EM*	Fx060-10-EM*	Fx060-5-EM*
Input Voltage		10 - 55 VDC	
Peak Output Current	50 A	20 A	10 A
Continuous Output Current	25 Arms	10 Arms	5 Arms
Network Communication		EtherCAT	
Feedback Supported		BiSS C-Mode, Incremental Encoder	
Dimensions		38 x 25 x 16 (mm)	

* Versions available:

FE060... (PCB Mount)

FM060... (w/ Interface Board)

FD060... (w/ Development Board)

Development Board

Ask about...

CANopen, RS485, other Ethernet fieldbuses

Absolute (EnDat, Hiperface), Sin/Cos, and Resolver Feedback

Higher power levels

Building block for modifications and complete custom solutions

Perfect for...

Cobots

Warehouse Robots and AGVs

Portable/Mobile Devices

Integrated Designs

Lab Automation

...And endless others!

ADVANCED
MOTION CONTROLS

Everything's Possible.
