Company Overview	3-4
Product Selection Guides	5-6
In-Line Gear Reducers	7-48
Highest Performance	
SPH Series: SPH-W, SPH-K, SPH-F	7-14
SPL Series: SPL-W, SPL-K, SPL-F	15-22
High Performance	
EPL Series: EPL-W, EPL-X, EPL-A, EPL-F, EPL-H	23-34
Stainless Steel Series: SSP-W	35-38
FP Series: FP-FB, FP-P, FP-F	39-42
Performance	
PE Series: PE-W, PE-N (NEMA)	43-48
Right-Angle Gear Reducers	49-76
Highest Performance	
Dyna Series: DS-W, DS-H, DS-T, DS-F	49-54
High Performance	
Dyna-Lite Series: DL-DW, DL-DH, DL-PW, DL-PH	55-60
Performance	
Spiral Bevel Series: V, L, VC, LL	61-76
Linear Mount Products	77-82
Performance	
Linear Slide Kit: LSK	79-80
Parallel Mount Kit: PMK	81-82
Couplings	83-98
Bellows Couplings	
KM Series	87
KP Series	88
KLC Series	89
KG Series	90
Elastomer Couplings	
EKC Series:	91
EKM Series	92
Distance Couplings	
WDS Series	93
EDC Series	94
Safety Couplings	
SKB Series: SKB-KP, SKB-EK, SKB	95-97
SKG Series	98
Sizing Information	99-100
Additional Products	101

▶ COMPANY OVERVIEW

GAM is your complete source for Gear Reducers, Servo Couplings, Linear Mounting Kits, and other innovative products used in automation technology.

With one of the largest product offerings in the motion control industry as well as the engineering expertise and manufacturing capabilities to develop customized solutions, GAM can help with your application.

Being flexible to meet the needs of customer requests and great service are what set us apart from the rest.

GAM Can.

- 1** We are flexible! We will modify our products or tailor our services to meet your needs. GAM Can, Just Ask!
- 2** Quick delivery on the standard products marked in our literature.
- 3** 24-Hour a day emergency service and same day delivery available.
- 4** Excellent technical assistance from our inside application engineers and trained network of outside sales engineers.
- 5** Immediate 2-D drawings or 3-D models configured on-line.
- 6** 100% inspection and quality control on every gearbox shipped from GAM.
- 7** Lean manufacturing procedures used to ensure our products are produced cost effectively.
- 8** Largest product range of precision gearboxes for motion control applications.
- 9** U.S. owned. Our roots date back to the early 1950s.
- 10** We have a great team at GAM. We will listen to you and we promise to do our very best to respond to your needs.

Can't Find What You Are Looking For? Just Ask GAM!

GAM's product range is among the broadest, if not the broadest, on the market for precision gearboxes. Even with such a broad product range, we realize that you may not find a gearbox that meets your exact requirements.

One of our strengths is our ability to customize standard designs to meet special needs. And, because of our flexible manufacturing, we can cost-effectively produce small batches of customized product in short time frames. So if you can't find what you are looking for, just ask GAM. Here are a few specials we have done for customers in the past:

- Special output shaft dimensions
- Custom output shaft features
- Stainless steel shaft
- Pinion gear assembly on output
- Special color of gearbox
- Steel-it paint on gearbox
- Anodized gearbox housing
- Custom output face on the gearbox
- Drop-in replacement for other gearboxes
- Special input clamping style (spline, set-screw, other)
- Special grease or oil
- Special bearings to modify gearbox ratings
- Special backlash
- Special housing design
- Vacuum environment gearbox
- Speed increasers
- Foot mounts
- Special mounting hardware
- Plastic gears
- Special gear ratios

Standard Dyna-Lite Hypoid Gear Reducer

Modified Dyna-Lite for Washdown Applications

▶ HIGHEST PERFORMANCE: SPH SERIES

The SPH series features helical gearing which brings a whole new level of power and precision to GAM's already extensive portfolio of gear reducer technology. With special attention paid to every aspect during development, the SPH gracefully combines design and engineering, to deliver our best inline planetary gear reducer yet. For dynamic and demanding servo applications where performance is critical, the SPH is highly powerful and efficient, yet smooth and quiet.

- 1. Helical Gears** Precision cut and ground to quietly deliver higher torques and accuracies
- 2. Adapter Flange** Custom machined to match any motor for easy installation
- 3. Input Clamping Element** Low inertia and balanced for high speeds with a single tangential screw ensures a secure motor connection
- 4. Bearings** Optimized taper roller bearings to accommodate high radial and axial loads
- 5. Housing** Sleek and contoured steel housing with black oxide treatment for maximum durability
- 6. Ring Gear** Machined directly into the single piece housing for maximum stiffness
- 7. Output Shaft** Offered smooth or keyed and can be easily shortened if required

Helical gears make the difference

The helical gear profile is cut at an angle that allows for gradual tooth engagement allowing for smooth, accurate, and quiet transmission. GAM's SPH gears are cut at the optimal helix angle to minimize resultant axial forces and they have a larger tooth width to maximize torque carrying capacity compared to the competition.

It all starts with the gears

The SPH's helical gears are produced to an extremely high level of quality and ground for further precision. With state of the art testing and measuring instruments and qualified personnel, we assure that the SPH will meet and exceed your requirements. With the SPH, every detail counts.

The SPH is GAM's highest performing inline gear reducer

Designed for **dynamic**
& **cyclic** applications

Can be optimized for **high speed**
and **continuous** applications

Sold & Serviced By:

ELECTROMATE

Toll Free Phone (877) SERV098
Toll Free Fax (877) SERV099
www.electromate.com
sales@electromate.com

Available configurations for simple and compact machine integration

SPH-W

Shaft output design for mounting to pulleys and rack and pinion systems. Available with a smooth or keyed output shaft.

SPH-K

Features a bellows or a zero backlash elastomer-spider coupling on the output for maximum stiffness and the best results in highly dynamic applications. An output housing comes standard with custom housings available.

SPH-F

Same benefits as the SPH-K models without the housing on the output. Plug the gearbox directly into your machine and achieve a more compact design.

When your application is demanding...demand GAM's SPH

	LOW	HIGH	SUPERIOR	WHY GAM SPH?
Flexibility	Competition A		SPH	Configured to meet the application, not the other way around!
	Competition B			
Modifications & Customizations	Competition A		SPH	Flexible manufacturing and experienced engineering
	Competition B			
Performance			SPH	95 years of gear manufacturing experience
			Competition A	
			Competition B	
Quality			SPH	State of the art testing and measuring machines. ISO 9001 Certified
			Competition A	
			Competition B	

The following methods are applied:

- CNC coordinate measurement method
- CNC gear measurement method
- Mechanical measurement test
- Surface testing
- Thickness measurement
- Magnetic particle inspection
- Hardness testing
- Grinding burn inspection

1) For larger motor shaft diameters, please contact GAM.

2) Depending on the motor, value can vary.

TYPE CODES FOR SPH-K SERIES

Example: SPH - KE - 060 - 005 G - [115 - 201] - S111

Gearbox Series

SPH Series

Gearbox Style

KB = Bellows coupling output
KE = Elastomer coupling output

Gearbox Size

050, 060, 075, 100, 140, 180

Ratio

3, 4, 5, 7, 10, 12, 15, 16, 20, 25, 28, 30,
35, 40, 50, 70, 100

Special Options

Assigned by GAM

Motor Mount Kit

Assigned by GAM

Options Available for This Product

G = Standard backlash and keyway
in output coupling
C = Reduced backlash and keyway
in output coupling
H = Standard backlash and no keyway
in output coupling
A = Reduced backlash and no keyway
in output coupling

▶ HIGHEST PERFORMANCE: SPL SERIES

GAM can.

If you don't see exactly what you need, let us know. We can modify the SPL Series gearboxes to meet your needs. Page 4 provides a list of commonly requested modifications to give you a feel for our capabilities.

The SPL is the next generation of our I.M.P.A.C.T.[®] series. It has been designed with the latest servo motors and your most demanding motion control applications in mind. The SPL can handle oversized motor shafts, higher input speeds, and high torques. Now the SPL has been expanded to incorporate our unique Integrated Modular Planetary and Coupling Technology (I.M.P.A.C.T.[®]). Our planetary and coupling package increases system stiffness and reduces the overall costs of conventional packages.

The SPL gearbox performance and quality, along with GAM's manufacturing flexibility and overall service, will provide you with the best solution on the market!

Benefits of the SPL Series include:

- Precision gears equal low backlash with quiet operation
- Long wear life: 30,000 hours
- Lubricated for life
- Ready for motor mounting
- Output dimensions match those of many conventional planetary gearboxes on the market
- Ratios from 3:1 to 100:1
- Frame sizes from 60 mm to 180 mm

1. Adapter Flange
(Customized adapter flanges for quick and easy motor mounting)
2. Viton[®] Seals
(Protective seals to isolate the gearbox)
3. Bearings
(Tapered roller bearings accommodate high overhung loads)

4. Input Clamping Element
5. Planet Gears
(Extra large face width gears pack a high level of torque in a small gearbox frame)
6. Gear Housing
(Ring gear incorporated into housing)
7. Keyway
(Available with keyway on output shaft)

www.electromate.com

sales@electromate.com

SPL-W

- Shaft output design for mounting to pulleys and rack and pinion systems
- Ratios from 3:1 to 100:1
- Frame sizes from 60 mm to 180 mm (larger sizes available by request)

SPL-K

- SPL-KB features a bellows coupling on the output
- Innovative bellow coupling on the output provides for maximum stiffness and best results in high dynamic applications
- Also available with a zero backlash elastomer-spider style coupling (SPL-KE) on the output
- Ratios from 3:1 to 100:1
- Frame sizes from 60 mm to 180 mm
- Output lantern comes standard with the SPL-K
- Custom lanterns available

SPL-F

- Same benefits as the SPL-K models without the bell housing on the output. Plug the gearbox into your machine and achieve a more compact design
- Ratios from 3:1 to 100:1
- Frame sizes from 60 mm to 180 mm

▶ HIGH PERFORMANCE: EPL SERIES

GAM can.

If you don't see exactly what you need, let us know. We can modify the EPL Series gearboxes to meet your needs. Page 4 provides a list of commonly requested modifications to give you a feel for our capabilities.

Our EPL Series is widely known as the best value on the market- tens of thousands of EPL's installed since 1998 in North America alone. That's because it offers the best quality available for the price point. We've added some features that make it unequalled in its class and ideal for most servo applications.

EPL Series enhancements include:

- A 50 mm frame size in our standard shaft version (-W) that is a drop-in for many gearboxes
- NEMA output version with oversized english shaft for improved performance
- Option for larger motor shafts

New output configurations include:

- EPL-A dimensions that drop in for popular planetary gearboxes on the market.
- EPL-F that features a flange output for a compact design and allows for easy connecting of mechanical elements such as pulleys and pinions.

1. Adapter Plate

(Customized adapter plates for quick and easy motor mounting)

3. Angular Contact Bearings

(for high radial and axial loading)

6. Ring Gear

(Ring gear incorporated into housing)

4. Input Clamping Element

5. Planet Gears

(Precision honed gears)

7. Output Face

Sold & Serviced By:

sales@electromate.com

2. Seals
(Protective seals to isolate the gearbox)

▶ HIGH PERFORMANCE: EPL SERIES

EPL-W

- GAM Metric Output Face
- Heavy Duty Output Bearings
- Ratios 3:1 to 1000:1
- Frame sizes from 50 mm to 150 mm
- Ready to mount to your motor

EPL-X (NEMA)

- NEMA output face with oversized english shaft
- Ratios 3:1 to 1000:1
- Frame sizes from NEMA 17 to 56
- Ready to mount to your motor

EPL-A

- Metric output dimensions match many other popular inline planetary gear reducers on the market.
- Ratios 3:1 to 1000:1
- Frame sizes from 50mm to 155mm
- Ready to mount to your motor

EPL-F

- Flange output
- Compact design
- Ratios 3:1 to 1000:1
- Ready to mount to your motor

EPL-H Linear Mount

- Hollow output with zero backlash clamping ring
- A quick, simple, low cost solution used to mount onto any “off the shelf” linear belt or ball screw module.
- Ready to mount to your motor on the input
- Ready to mount to your module on the output
- For more information on Linear Mounts, refer to page 77.

▶ HIGH PERFORMANCE: SSP SERIES

GAM can.

If you don't see exactly what you need, let us know. We can modify the SSP Series gearboxes to meet your needs. Page 4 provides a list of commonly requested modifications to give you a feel for our capabilities.

Our Stainless Steel Planetary (SSP) Series is an innovative washdown servo gearbox solution designed for food, medical or sanitary applications. It is a precision planetary gearbox outwardly constructed of 300-series stainless steel. The motor adapter plate, housing and shaft are all stainless steel. Viton® seals, stainless steel hardware and sealed interfaces provide outstanding corrosion resistance in all types of wet and caustic washdown environments. Ideal for any light or demanding servo application where corrosion resistance is a requirement, the SSP Series offers economy, high precision, and long lasting performance.

SSP Series benefits:

- All exposed surfaces stainless steel
- Frame sizes from 70 to 120 mm
- Ratios from 3:1 to 100:1

Suitable for food or medical applications!

1. Adapter Flange

(Stainless steel adapter for quick and easy motor mounting)

2. Hole Plug

(Threaded stainless steel plug)

3. Lubrication (internal)

(Standard with food grade grease)

4. Seals (internal)

(Viton® seals keep contaminants out and lubricant in and achieves an IP66 rating)

5. Shaft

(Stainless steel keyed output shaft)

SSP-W

SSP-W

- Dual output bearings for high radial and axial loading
- Frame sizes from 70 mm to 120 mm
- Ratios from 3:1 to 100:1

SSP-W Rear View

SSP-W

- Input clamping element for fast and easy mounting
- Optional input O-ring to keep contaminants out custom designed for your motor. (Special request at time of order)

SSP-W with Coupling

SSP-W

- Optional stainless steel output coupling KG-VA for corrosion resistant connections to other shafts
- Contact GAM for more information on these couplings

▶ HIGH PERFORMANCE: FP SERIES

GAM can.

If you don't see exactly what you need, let us know. We can modify the FP Series gearboxes to meet your needs. Page 4 provides a list of commonly requested modifications to give you a feel for our capabilities.

The FP Series is a “shaftless” planetary gearbox that offers advantages in space and performance. The output flange allows machine elements such as pinion gears, pulleys, rotary index tables, and transmission shafting to be easily connected directly to the output. The design also provides high torsional and tilting rigidity that improves machine performance.

Features and Benefits of the FP Series include:

- Compact design
- High tilting rigidity for high overhung loads
- Best in class performance for accuracy due to
 - High torsional stiffness
 - Low backlash
- Lightweight
- Long design life of 20,000 hours
- Lubricated for life
- Ready for motor mounting
- Ratios 3:1 - 91:1
- Frame sizes from 50 mm to 120 mm

1. Adapter Flange
(Customized adapter flanges for quick and easy motor mounting)

2. Output Bearing (internal)
(Innovative bearing arrangement for high stiffness)

3. Output Flange
(Easily mount components directly to flange)

4. Flange Pilot
(Centering pilot for machine elements)

5. Mounting Flange
(Allows for compact machine mounting)

▶ HIGH PERFORMANCE: FP SERIES

FP-FB
Bellows output

FP-FB

- Integrated coupling on output for high torsional stiffness and a zero backlash connection while compensating for misalignment
- Available with flange mounted bellows or elastomer couplings

Shown with custom shaft easily bolted to gearbox.

- Simplify machine system – GAM can provide custom shafts with standard FP gearboxes
- Shafts can be easily added and removed with a few bolts when changes are required

Shown with pinion gear bolted to the output face.

- A true zero backlash connection of the pinion to the gearbox.
- Ideal for compact, rigid systems

Shown with output face fastened to stationary element. Gearbox housing will rotate.

FP-P

- Fixing output will allow rotation of housing
- A compact solution for space constraints

- Eliminate unnecessary components by fastening machine elements to the gearbox
- Gearbox housing rotates to directly drive a wheel or pulley

▶ PERFORMANCE: PE SERIES

GAM can.

If you don't see exactly what you need, let us know. We can modify the PE Series gearboxes to meet your needs. Page 4 provides a list of commonly requested modifications to give you a feel for our capabilities.

The GAM PE series is a great gearbox value for servo, stepper, and other motion control applications. It offers the best quality available for the price point. Based on the design of the popular EPL series, the PE series is a reliable alternative when radial or axial loadings are minimized.

PE Series offers:

- Metric output (4 sizes)
- NEMA output (4 sizes)
- Wide range of ratios (3:1 to 1000:1)
- Available to purchase online!
- Improved backlash specifications
- Increased service life

- | | |
|---|---|
| 1. Adapter Plate
(Customized adapter plates for quick and easy motor mounting) | 4. Input Clamping Element |
| 2. Seals
(Protective seals to isolate the gearbox) | 5. Planet Gears
(Precision honed gears) |
| 3. Ball Bearings
(dual ball bearings) | 6. Ring Gear
(Ring gear incorporated into housing) |
| | 7. Output Face |

PE-W

PE-W

- Metric output face
- Ratios 3:1 to 1000:1
- Frame sizes from 50 mm to 118 mm
- Ready to mount to your motor

PE-N (NEMA)

PE-N (NEMA)

- NEMA output face
- Ratios 3:1 to 1000:1
- Frame sizes from NEMA 17 to 42
- Ready to mount to your motor

PE-N (with EKC)

PE-N (shown with GAM's EKC elastomer coupling)

- Use the PE Series gearbox with the EKC coupling for the most cost-effective solution!

▶ HIGHEST PERFORMANCE: DYNA SERIES

GAM can.

If you don't see exactly what you need, let us know. We can modify the Dyna Series gearboxes to meet your needs. Page 4 provides a list of commonly requested modifications to give you a feel for our capabilities.

The Dyna Series is our highest performance right-angle gear reducer utilizing sophisticated hypoid gearing. The benefit of hypoid gearing is that it combines the space and configuration advantages of worm gearing with the high efficiencies of bevel gearing. The result is that the Dyna Series is able to achieve ratios up to 15:1 in a single stage and ratios up to 100:1 in 2 stages.

⚠ **DSX version for the highest performance available!**

The DSX is our flagship right angle hypoid gearbox that has been optimized for the most demanding motion control applications that require high angular accuracy. Featuring hypoid gears that have been ground, the DSX has the smoothest torque transmission and extremely low backlash and noise levels.

Contact GAM for further information on the DSX.

Dyna Series benefits include:

- Ratios up to 15:1 in a single stage – the highest in the market – and 100:1 in just two gear stages
- High efficiencies
- High allowable axial and radial loading
- Ultra low backlash
- Back drivable
- Multiple output shaft configurations and hollow output

High ratio version

- 1. Aluminum Housing**
(Aluminum housing significantly reduces the weight of the gearbox)
- 2. Hypoid Gearing**
(Optimized gearing allows ratios up to 15:1 in a single stage; 100:1 in two stages. DSX gears are ground for improved performance.)
- 3. Adapter Flange**
(Customized adapter flanges for quick and easy mounting to any motor)
- 4. Coupling**
(Gearbox can be supplied with either a bellows or elastomer coupling)
- 5. Tapered Roller Bearings**
(Roller bearings for high radial and axial loading)
- 6. Output Shaft**
(Gearbox can be supplied with one or two solid shafts or hollow shafts)

DS-W

- Single output shaft configuration with our high performance bellow coupling input and machined motor flange to mount to any servo motor
- Frame sizes from 55 mm to 190 mm
- ⚠ DSX option available

DS-H

- Hollow bore output configuration with our high performance bellow coupling input and machined motor flange to mount to any servo motor
- Zero-backlash shrink disk coupling on the output included with the gearbox
- Frame sizes from 55 mm to 190 mm
- ⚠ DSX option available

DS-T

- Dual output shaft configuration with our high performance bellow coupling input and machined motor flange to mount to any servo motor
- Frame sizes from 55 mm to 190 mm
- ⚠ DSX option available

DS-F

- Flange output allows connection of pinion gears, pulleys, rotary index tables, and transmission shafting directly to the output for a more compact and stiffer solution
- Frame sizes from 55 mm to 190 mm
- ⚠ DSX option available

▶ HIGHEST PERFORMANCE: DYNA SERIES

The Advantage of Hypoid Gearing

The GAM Hypoid offers significant advantages over other conventional right-angle gears.

Conventional spiral bevel gearing, meshing in the position shown at the bottom of the drawing, has a purely rolling meshing action that is mechanically very efficient. Its drawback is that it offers the smallest total tooth contact area, so its torque throughput capacity is lower. Single-stage spiral bevel gearing is limited to about a 6:1 reduction ratio. It's easy to get higher ratios with multiple-stage configurations, but the additional gear stage lowers mechanical efficiency, increases backlash, consumes space and weight and reduces reliability.

Conventional worm gearing, meshing in the position shown at the top of the drawing, has a very high total tooth contact area. While it offers high torque throughput and high ratio reduction, worm gearing has the lowest mechanical efficiency, due to the friction generated by its high component of sliding action. Worm gearing is also subject to the kind of wear that demands adjustment in order to maintain accuracy.

Hypoid gearing, meshing at the intermediate position, offers mostly rolling action with a small component of sliding action. It has a greater tooth contact area than bevel gearing, so its load-carrying capability is greater. The GAM Hypoid offers further advantages by going up to a 15:1 gear ratio in a single stage with efficiencies between 93% and 96%, depending upon ratio throughout the speed range. Another important design criterion for precision servo applications is, of course, low backlash in the gear box.

The GAM Hypoid offers two important advantages:

- Single-stage design eliminates backlash from a second set of meshing gears
- Accurate machining and assembly alignment – high-accuracy models offer backlash of ≤ 2 arcminutes.

GAM Hypoid gearing is available in two product ranges, our highest precision Dyna Series, and high precision, Dyna-Lite Series.

The placement of the input gear along the arc of the driven gear has a significant impact on load-carrying capabilities and mechanical efficiency

▶ HIGH PERFORMANCE: DYNA-LITE SERIES

GAM can.

If you don't see exactly what you need, let us know. We can modify the Dyna-Lite Series gearboxes to meet your needs. Page 4 provides a list of commonly requested modifications to give you a feel for our capabilities.

Now there's a right-angle gearbox that has the performance and price point of a precision in-line gearbox. Our redesigned Dyna-Lite Series use hypoid gearing that combines the space and configuration advantages of worm gearing with the high efficiency of bevel gearing. It is drop-in replacement for many right-angle and in-line planetary gear reducers.

Dyna-Lite Series benefits include:

- High efficiency – 96%
- Standard backlash < 6 arcmin
- Back drivable
- High radial loading
- Available in shaft output and hollow output

1. Adapter Plate
(Allows for quick and easy motor mounting)

2. Bearings
(Upper roller bearings allows high radial loading of output shaft)

3. Bellows Coupling
(Bellows coupling for quick motor mounting)

4. Hypoid Gearing
(Optimized gearing allows ratios up to 15:1 in a single stage; 150:1 in two stages)

DL-DW

DL-DW High Ratio
(High Ratio available on all versions)

DL-DW

- Single output shaft configuration with our high performance bellow coupling
- Input and housing to mount to any servo motor
- Ratios up to 15:1 in a single stage and 150:1 in two stages
- Frame sizes: 55, 75 and 90 mm
- Drop-in for our highest precision Dyna Series

DL-DH

DL-DH

- Smooth hollow output shaft configuration (includes shrink disc)
- Input and housing to mount to any servo motor
- Ratios up to 15:1 in a single stage and 150:1 in two stages
- Frame sizes: 55, 75 and 90 mm
- Drop-in for our highest precision Dyna Series

DL-PW

DL-PW

- Single output shaft configuration with our high performance bellow coupling
- Input and housing to mount to any servo motor
- Ratios up to 15:1 in a single stage and 150:1 in two stages
- Frame sizes: 55, 75 and 90 mm
- Drop-in for many right-angle and in-line planetary gear reducers
- Rotation direction is opposite for DW and PW models.

DL-PH
(Available upon request)

DL-PH (Contact GAM for availability)

- Smooth hollow output shaft configuration (includes shrink disc)

▶ PERFORMANCE: SPIRAL BEVEL SERIES

GAM can.

If you don't see exactly what you need, let us know. We can modify the VC Series gearboxes to meet your needs. Page 4 provides a list of commonly requested modifications to give you a feel for our capabilities.

GAM Spiral Bevel Gearboxes

When you need a spiral bevel gearbox that you can count on, choose GAM. Our spiral bevel gearboxes are highly configurable, reliable, and economical right angle solutions designed for use in a wide range of applications. Precision cut spiral bevel gears are hardened and then lapped in pairs for ideal tooth contact and torque transmission, enabling 94-98% efficiencies and backlash between 10 and 30 arcmin (Reduced backlash versions available). Offered in 11 frame sizes, they can be constructed with a multitude of shaft configurations, and oriented in any direction to easily incorporate into your machine design.

VC spiral bevel series shown with integrated motor mount.

- High efficiencies 94-98%
- Lubricated for life with synthetic oil
- Includes motor mount

1. Housing

Sturdy cast iron housing
(Aluminum in size 35mm and 45mm)
- all 6 sides can be used for mounting

2. Bearings

Deep groove ball bearings handle axial and radial loading. (Reinforced and taper roller options available)

3. Spiral Bevel Gearing

Precision cut, hardened, and lapped in pairs for ideal tooth contact. Mathematically precise ratios from 1:1 to 6:1

4. Input

Available with shaft input or integrated motor adapter and coupling to easily mount to any IEC, NEMA, or servo motor

5. Output

Solid shaft with key or keyed hollow shaft are standard. (Smooth shaft or shrink disc clamping available)

6. Seals

Lubricated for life and protected with high quality NBR seals. (Viton® and FPM seals available)

▶ LINEAR MOUNT PRODUCTS

GAM can.

If you don't see exactly what you need, let us know. We can modify the EPL Series gearboxes to meet your needs. Page 4 provides a list of commonly requested modifications to give you a feel for our capabilities.

GAM Linear Mount Products take the hassle out of mounting your motor or gearbox to a linear ball screw or belt actuator. This unique product offering consists of motor mount kits, inline and right angle gearboxes, as well as couplings. For everything between the motor and actuator, GAM Can!

GAM's EPL-H is an innovative inline gear reducer that features a hollow output design which allows direct connection to linear products. This eliminates the need for any additional couplings or adapters for the most compact and cost effective solution available. Right angle options are available.

EPL-H Series Features

- Low backlash
- Precision gears
- Lightweight
- Lubricated for life
- Mounts to any off the shelf linear belt or ball screw modules
- All adapters and hardware included

Just tell us what motor and what module you want to mount and GAM will take care of all the engineering.

- 1. Adapter Plate**
(Customized adapter plates for quick and easy motor mounting)
- 2. Seals**
(Protective seals to isolate the gearbox)
- 3. Ball Bearings**
(Single ball bearing in the EPL-H-064; dual ball bearings in all other sizes and styles)
- 4. Input Clamping Element**
- 5. Planet Gears**
(Precision honed gears)
- 6. Ring Gear**
(Ring gear incorporated into housing)
- 7. Output Face**
(Ready to mount to belt or ball screw modules)

EPL-H Gearboxes

- Our most popular in-line planetary with a unique hollow output and zero-backlash clamping ring
- Quick, simple, and low-cost solution used to mount onto any off-the-shelf linear belt or ball screw modules
- Precision gears
- Ratios up to 1000:1
- Frame sizes from 64 mm to 118 mm
- Same backlash and efficiencies as EPL Series (Specs on pg. 33)

EPL-H with Linear slide

Linear Slide Kit (LSK)

- Customized assembly to mount any motor or gearbox to any linear slide
- In line motor mounting
- Coupling included
- Quick delivery

LSK with linear slide

Parallel Mount Kit (PMK)

- Customized assembly to mount any motor or gearbox to any linear ball screw product
- Parallel motor mounting design
- Includes timing pulleys, belt, and hardware.
- Quick delivery

PMK with linear slide

▶ LINEAR MOUNT: LINEAR SLIDE KIT (LSK)

GAM can.

If you don't see exactly what you need, let us know. We can modify the LSK to meet your needs.

Our no-hassle solution for mounting linear slides to motors and gearboxes is our LSK (Linear Slide Kit.) It can be customized to any motor or gearbox and linear slide. A coupling is included – bellows or elastomer. The LSK is readily available and comes complete with mounting hardware. You just need to tighten the bolts.

- A customized mounting solution without the long lead times
- Three sizes
- Quick delivery
- Reasonably priced
- GAM provides all engineering and design for your application
- 2D/3D configurable LSK models now available at www.gamweb.com

Just tell us what motor and what module you want to mount and GAM will take care of all the engineering.

- 1. Slide Adapter Flange**
(Custom adapter for any linear slide module)
- 2. Coupling**
(Custom machined coupling with or without keyways)
- 3. Motor Adapter Flange**
(Custom adapter for any servo motor)
- 4. Hardware**
(All mounting hardware provided in kit)

▶ LINEAR MOUNT: PARALLEL MOUNT KIT

Parallel Mount Kit (PMK)

The latest addition to GAM's innovative linear mount product line is the new PMK (Parallel Mount Kit) series. The PMK can help save space and reduce the overall length of an actuator by bringing the motor parallel to the ball screw. Unlike similar products available on the market, the PMK was designed for flexibility enabling you to connect any motor to any linear ball screw actuator.

Features

- 4 frame sizes
- Easily mounted horizontally or vertically
- Torques up to 46Nm (407 in-lbs)

1. Housing

Machined aluminum and anodized

2. Belt

High torque rubber timing belt

3. Pulleys

Low inertia and custom machined

4. Adapter Flange

Designed specifically for any linear ball screw actuator and motor

5. Hardware

All mounting hardware provided in kit

▶ COUPLING OPTIONS FOR EVERY APPLICATION

Bellows Couplings

- High torsional rigidity, low inertia, zero backlash and misalignment compensation
- Can be used at temperatures up to 570°F without any limitations and maintenance free
- Patented Press-Fit method of joining the bellows to the hubs can withstand harsh environments where glued connections cannot
- High speeds: rotational speeds up to 25,000 RPM without additional balancing

MOST POPULAR – Available Same Day

KM Series

- Provides the best balance between coupling stiffness and shaft misalignment compensation
- Aluminum hubs provide low inertia for servo systems
- Radial clamping hub with EASY Clamp system for easy install/uninstall
- Bore range: 3 mm - 85 mm
- Torque range: 0.4 Nm - 1800 Nm

KP Series

- Similar to the KM coupling
- Shorter in length to provide an even higher torsional stiffness, but lower misalignment capability
- Aluminum hubs provide low inertia for servo systems
- Radial clamping hub with EASY Clamp system for easy install/uninstall
- Bore range: 3 mm - 75 mm
- Torque range: 2 Nm - 900 Nm

KLC Series

- Low cost bellows coupling
- Steel hubs with radial clamping: higher inertia
- Short length for high torsional stiffness
- Bore range: 10 mm - 43 mm
- Torque range: 25 Nm - 125 Nm

KG Series

- Similar to the KLC coupling
- Radial clamping hub with EASY Clamp system for easy install/uninstall
- Also available in all stainless steel (KG-VA). Same dimensions as KG.
- Additional sizes
- Bore range: 6 mm - 90 mm
- Torque range: 5 Nm - 1300 Nm

KGH Series (full info at www.gamweb.com)

- Similar to the KG coupling
- Split hubs allow the coupling to be installed onto shafts that cannot be moved
- Custom lengths
- High stiffness
- Bore range: 6 mm - 85 mm
- Torque range: 20 Nm - 1600 Nm

KSD Series (full info at www.gamweb.com)

- High clamping forces and high torque
- Maximum misalignment with short length
- Self-centering conical bushings
- Bore range: 6 mm - 102 mm
- Torque range: 10 Nm - 2500 Nm

KHS Series (full info at www.gamweb.com)

- High speeds up to 25,000 rpm
- Very low inertia
- High stiffness
- Bore range: 6 mm - 60 mm
- Torque range: 15 Nm - 600 Nm

KR Series (full info at www.gamweb.com)

- Unique bellows design yields the highest performance in stiffness, for the most demanding servo applications.
- Radial clamping hub with EASY Clamp system for easy install/uninstall
- Bore range: 14 mm - 89 mm
- Torque range: 25 Nm - 1500 Nm

KSS Series (full info at www.gamweb.com)

- Similar to the KR coupling
- Self-centering conical bushings for high clamping forces
- Short length and high torque
- Bore range: 10 mm - 102 mm
- Torque range: 25 Nm - 2500 Nm

KPP Series (full info at www.gamweb.com)

- Plug-in design with high stiffness
- EASY Clamp system for easy install/uninstall
- Short length
- Bore range: 6 mm - 70 mm
- Torque range: 10 Nm - 600 Nm

KPS Series (full info at www.gamweb.com)

- Expandable split shaft design
- EASY Clamp system for easy install/uninstall
- For hollow bore applications
- Bore range: 3 mm - 70 mm
- Torque range: 2 Nm - 600 Nm

WDS Series

- Drive shaft coupling with split hubs
- Lengths up to 20 feet
- High speeds and low inertia
- Bore range: 6 mm - 85 mm
- Torque range: 15 Nm - 1600 Nm

Elastomer Couplings

- The use of elastomer spiders with shore hardness ratings from 92 Sh A, 98 A, to 72 D permit dampening of vibration caused by system resonance
- An affordable alternative if high stiffness is not critical
- The involute shaped teeth of the elastomer spider and jaws are preloaded and will not loosen over time. Ensures zero backlash and allows for easy plug-in assembly

MOST POPULAR – Available Same Day

EKC Series

- Low cost elastomer spider coupling for motion control applications
- Zero backlash over the life of the product
- Easy to mount radial clamping hubs
- Bore range: 5 mm - 45 mm
- Torque range: 5 Nm - 110 Nm

EKZ Series (full info at www.gamweb.com)

- Drive shaft coupling with radial clamping hubs
- Excellent dampening capabilities
- Lengths up to 3m
- Bore range: 10 mm - 70 mm
- Torque range: 20 Nm - 700 Nm

EKM Series

- Excellent dampening capabilities
- Easy to mount radial clamping hubs
- Same day delivery available
- Bore range: 3 mm - 70 mm
- Torque range: 2 Nm - 1000 Nm

ESM-A Series (full info at www.gamweb.com)

- Excellent dampening capabilities
- High speeds
- Conical clamping hubs
- Bore range: 6 mm - 60 mm
- Torque range: 10 Nm - 1000 Nm

EDC Series

- Low cost elastomer drive shaft coupling
- Customized lengths up to 20 feet
- Quick standard delivery
- Bore range: 8mm - 45mm
- Torque Range: 25 - 110Nm

Protect Your Investment from Crashes and Jams with Safety Couplings

- Low inertia; compensation of misalignment
- Zero backlash: high torsional stiffness
- Patented Press-Fit method joins bellows to the hubs to withstand harsh environments
- Automatic re-engagement: occurs every 360°
- Integrated bearing support: eliminates the need for support inside the pulley and enables compact size
- Degressive cup spring characteristic: immediate torque drop-off

Direct Drive Safety Couplings

SKB-KP Series

- Single point 360° re-engagement
- Adjustable torque
- Maximum misalignment and high stiffness
- Bore range: 6 mm - 100 mm
- Torque range: 2 Nm - 3000 Nm

SKY-KS Series (full info at www.gamweb.com)

- Single point 360° re-engagement
- Adjustable torque
- Self-centering conical bushings
- Bore range: 5 mm - 70 mm
- Torque range: 2 Nm - 3000 Nm

SKB-EK Series

- Single point 360° re-engagement
- Adjustable torque
- Excellent dampening capabilities
- Bore range: 6 mm - 100 mm
- Torque range: 2 Nm - 1000 Nm

SKY-ES Series (full info at www.gamweb.com)

- Single point 360° re-engagement
- Adjustable torque with self-centering conical hubs
- Excellent dampening capabilities
- Bore range: 5 mm - 70 mm
- Torque range: 2 Nm - 1000 Nm

Indirect Drive Safety Couplings

SKB Series

- Radial clamping hub connection to the shaft
- Single point 360 degree re-engagement
- Integrated ball bearing for the highest true running accuracy
- Adjustable torque
- Very high clamping forces and torque range
- Bore range: 6 mm - 100 mm
- Torque range: 2 Nm - 3000 Nm

SKG Series

- Single point 360° re-engagement
- Integrated bearing to support pulleys & sprockets
- Adjustable torque with self-centering hub
- Bore range: 12 mm - 44 mm
- Torque range: 2 Nm - 550 Nm

SKX-L Series (full info at www.gamweb.com)

- Single point 360° re-engagement
- Adjustable torque
- Bore range: 7 mm - 58 mm
- Torque range: 2 Nm - 800 Nm
- Our most economical in-direct drive safety coupling

▶ COMPONENT OVERVIEW

Hubs:

Aluminum Radial Clamping Hub (also available in steel and stainless steel)

- High tensile strength, low weight aerospace aluminum provides very low inertia for better system performance.
- New EASY Clamp System prevents damage to hubs for easy shaft mounting and dismounting while compensating for tolerance differences between shaft and hub. (Available on select couplings.)
- Balancing Plug is positioned at a precise angle in the hub for balanced, high speed performance.
- Precision machined involutes (not a die cast).
- Zero backlash torque transmission is guaranteed.
- Only one clamping screw allows for fast installation.

Steel Conical Bushings (also available in aluminum for high torque, high speed applications up to 25,000 rpm)

- High clamping forces to insure safe transmission of torque and backlash free connection.
- Additional draw-off holes provide easy hub removal.
- Unique hub design offers shortest coupling length.
- Precision machined aluminum conical clamping ring insures a high speed balanced coupling up to 25,000 rpm at very high torque ranges.

Special Hub Designs

- Flange mounted versions allow custom mounting configurations directly to the machine.
- All metal pluggable versions offer easy mounting in high temperature applications up to 300°C (572°F).
- Expanding cone clamping hub is ideal for hollow shaft assembly.

Connection Methods:

Brass Wire Press-Fit Connection

- Mechanically formed between hub and multi-layered bellow for a strong zero backlash connection.
- No glue connection insures connection in high temperature, chemical sensitive applications.

Welded Connection

- Micro plasma weld connection offers excellent weld consistency and even heat distribution resulting in high quality welds for a long lasting connection between hub and bellow.
- Ideal for high temperature applications where steel or stainless steel is required.

Torque Transmission Elements:

Bellows

- Guarantees a zero backlash torque transmission with extremely high torsional stiffness while maintaining flexibility for compensation of misalignment.
- Low mass moment of inertia for increased system performance.
- Maintenance free up to temperatures of 300°C (572°F).
- Depending upon torsional stiffness requirements, lateral spring rates and lengths, standard bellows are available in 2, 4 and 6 corrugations. For longer lengths, custom manufacturing is available.

Elastomers

- Elastomers vary in hardness values from 98 Shore A (red) for maximum dampening capabilities to 72 Shore D (white) where higher stiffness is required.
- Excellent electrical insulator to prevent the transfer of electrical fields.
- Involute shaped teeth provide easy plug-in assembly for long and durable life.

Torque Tubes

- Available in aluminum, steel or stainless depending upon torque and length requirements.
- The different materials can accommodate different stiffness requirements at various lengths.

▶ KM SERIES BELLOWS COUPLINGS

Major Features

- Maximum flexibility in the angular, axial and lateral directions and high torsional stiffness.
- With EASY Clamp System for easy install and un-install.
- Same day delivery available

Material

- Stainless steel bellow; aluminum hubs

▶ KP SERIES BELLOWS COUPLING

Major Features

- Higher torsional stiffness and a shorter overall length.
- Tightening only one screw per hub locks the coupling free of backlash.
- Advantageous for space constrained or blind assembly installations.
- With EASY Clamp System for easy install and un-install.

Material

- Stainless steel bellow; aluminum hubs

LOW COST SERVO COUPLING EKC SERIES ELASTOMER COUPLING

Major Features

- Low cost elastomer coupling for motion control applications
- Quick standard delivery (same day delivery available)
- Star-shaped elastomer element with involute tooth profile and high shore hardness ensures zero backlash over life of product.
- Elastomer spider compensates for small shaft misalignments.
- Available to purchase online!

Material

- Anodized aluminum hubs and polyurethane 92 Shore A, 98 Shore A, and 72 Shore D spiders available

▶ EKM SERIES ELASTOMER COUPLINGS

Major Features

- Easy-to-mount radial clamping hubs.
- Star-shaped elastomer element with involute tooth profile and high shore hardness ensures zero backlash over life of product.
- Electrically insulating and dampens oscillation resonance.
- Elastomer spider compensates for small shaft misalignments.
- Same day delivery available.

Material

- Aluminum hubs; polyurethane 72 Shore D spider
- Aluminum hubs; polyurethane 98 Shore A spider

Couplings must be selected so nominal torque is higher than highest operational torque of the application (i.e., during acceleration).
 Bore diameters smaller than the minimum are possible but reliable transmission of nominal torque cannot be guaranteed.

▶ WDS SERIES BELLOWS DRIVE SHAFT COUPLING

Major Features

- Bellows drive shaft coupling with split hubs.
- Customized lengths up to 20 feet.
- High speeds, very low inertia.
- Compensation of high radial loads for prevention of premature bearing failure.

Material

- Aluminum hubs (size 15-400)
- Steel hubs (size 800-1600)
- Stainless steel bellow; aluminum tubing

Technical data/Dimensions

SKB-KP DIRECT DRIVE BELLOWS SAFETY COUPLING

Major Features

- Bellows safety coupling with radial clamping hubs.
- Upon disengagement, coupling will re-engage automatically at only one point per revolution and retain the drive's reference point.
- Bellow compensates for axial, lateral and angular misalignment.
- Adjustable disengagement torque.

Material

- Stainless steel bellow; aluminum and steel hubs; steel safety element

SKB-EK DIRECT DRIVE ELASTOMER SAFETY COUPLING

Major Features

- Elastomer safety coupling with radial EASY Clamp System hubs.
- Upon disengagement, coupling will re-engage automatically at only one point per revolution and retain the drive's reference point.
- Star-shaped elastomer element with involute tooth profile and high shore hardness ensures zero backlash over life of product.
- Electrically insulating and dampens oscillation resonance.

Material

- Aluminum and steel hubs; elastomer spider; steel safety element

SKB SERIES INDIRECT DRIVE SAFETY COUPLING

Major Features

- Pulley safety coupling with self-centering conical hub and integrated bearing.
- Upon disengagement, coupling will re-engage automatically at only one point per revolution and retain the drive's reference point.
- Integrated bearing for high axial and radial loading to support pulleys, gears or sprockets.
- Adjustable disengagement torque.

Material

- Steel hubs; steel safety element

Sold & Serviced By:

Coupling must be selected so nominal torque is higher than highest operational torque of the application (i.e., during acceleration).
Bore diameters smaller than the minimum are possible but reliable transmission of nominal torque cannot be guaranteed.

▶ SIZING INFORMATION

Determination of the Duty Cycle (ED)

$$ED = \frac{t_a + t_c + t_d}{t_{cycle}}$$

If $ED < 60\%$ and $(t_a + t_c + t_d) < 20$ minutes, perform a cycle operation selection (S5)

If $ED > 60\%$ or $(t_a + t_c + t_d) > 20$ minutes, perform a continuous operation selection (S1)

Index	
1	Input
2	Output
a	Acceleration
B	Maximum Acceleration
c	Constant
d	Deceleration
m	Mean
max	Maximum
n	Nominal
p	Pause

Symbol	Unit	Description
ED	%	Duty Cycle
fs	-	Shock Factor
i	-	Ratio
J	kg-cm ²	Moment of Inertia
n	RPM	Speed
t	s	Time
T	Nm	Torque
Zh	-	Number of Cycles
η_j	%	Efficiency

Selection of Optimum Gearbox for a Continuous Operation (S1)

Data needed before selection can be performed:

1. Output profile
2. Desired ratio (i)

Calculations to be performed:

1. Mean Output Speed

$$\Rightarrow n_{2m} = \frac{n_{2a}t_a + n_{2c}t_c + n_{2d}t_d}{t_a + t_c + t_d} = \underline{\hspace{2cm}}$$

2. Root - Mean Output Torque

$$\Rightarrow T_{2m} = \sqrt[3]{\frac{n_{2a}t_a T_{2a}^3 + n_{2c}t_c T_{2c}^3 + n_{2d}t_d T_{2d}^3}{n_{2a}t_a + n_{2c}t_c + n_{2d}t_d}} = \underline{\hspace{2cm}}$$

Selection Criteria for Gearbox:

1. Mean Output Speed must not exceed the nominal speed rating of the gearbox.

$$n_{2m} \cdot i \leq n_{1n}$$

2. Mean Output Torque must not exceed the nominal torque rating of the gearbox.

$$T_{2m} \leq T_{2n}$$

See technical data tables for values of n_{1n} and T_{2n}

Sold & Serviced By:

www.electromate.com

99 sales@electromate.com

Selection of Optimum Gearbox for a Cycle Operation (S5)

Data needed before selection can be performed:

1. Maximum Torque of the motor (T_{IB})
2. Output profile
3. Desired ratio (i)
4. Inertia of the load (J_L)*
5. Inertia of the motor (J_{motor})*

*optional

Calculation to be performed:

1. Shock Factor (f_s)

$$Z_h = \frac{3600}{t_{cycle}}$$

$Z_h < 1000$	$\Rightarrow f_s = 1.0$
$1000 < Z_h < 1500$	$\Rightarrow f_s = 1.1$
$1500 < Z_h < 2000$	$\Rightarrow f_s = 1.3$
$2000 < Z_h < 3000$	$\Rightarrow f_s = 1.6$
$3000 < Z_h <$	$\Rightarrow f_s = 2.0$

2. Maximum Output Torque

$$T_{2max} = T_{IB} \cdot i \cdot f_s \cdot \eta = \underline{\hspace{2cm}}$$

Selection Criteria for Gearbox:

1. Maximum Output Speed must not exceed the maximum speed rating of the gearbox.
2. Maximum Output Torque must not exceed the maximum torque rating of the gearbox.
3. (optional) Match inertia of the motor to the inertia of the load.

$$n_{2c} \cdot i \leq n_{1max}$$

$$T_{2max} \leq T_{2B}$$

$$J_{motor} \approx J_1 + \frac{J_L}{i^2}$$

See technical data tables for values of η , n_{1max} , T_{2B} , and J_1

Sizing and Selecting for Couplings and Safety Couplings

Sizing

1. Determine torque (M_N)

$$M_N = M_a \cdot \frac{J_{load}}{J_{load} + J_{drive}} \cdot 2.5$$

M_N Nominal Torque of Coupling

M_a Acceleration Torque of Motor

C

f Resonant frequency [Hz]

J_{mot} Motor inertia + 1/2 coupling inertia [kgm²]

J_{moch} Load inertia + 1/2 coupling inertia [kgm²]

In general $f_{coupling} \geq 2 \cdot f_{drive}$

2. Verify resonant frequency

$$f_{coupling} = \sqrt{C_{coupling}}$$

$$f_{drive} = \frac{1}{2\pi} \sqrt{C_{drive} \cdot \frac{(J_{drive} + J_{load})}{(J_{load} \cdot J_{load})}}$$

3. Apply operating temperature safety factor only for elastomer couplings

Operating Temperature	< 50°C	50°C - 70°C	70°C - 90°C	90°C - 110°C	> 110°C
Multiply M_N by	1	1.3	1.6	1.8	2

Selecting:

- 1) Determine series of coupling
- 2) Determine size of coupling based on MN
- 3) Verify shaft diameters are within range

Ordering Examples:

(When ordering, please include shaft sizes and tolerances)

Standard Coupling KM-20

DI = 14 mm k6

D2 = 1.00" +0/-0.0005", x 1/8" keyway

Safety Coupling SKB-30

DI = 19 mm k6

TA (disengagement torque) = 25 Nm

Drive Shaft Coupling WDS-I00

DI = .500" +/- .0005"

D2 = 32 mm k6

Distance Between Shafts = 915 mm

▶ ADDITIONAL PRODUCTS

Our Extensive Product Range

GAM has access to a wide variety of complementary motion control and power transmission products which expands our product range even further and makes your machine design experience easier and more efficient.

VS - Spiral Bevel Speed Increaser

- Available in 6 frame sizes from 90mm up to 260mm
- Ratios 1.5:1 to 2:1
- Multiple shaft configurations offered

SLC - Servo Worm Gearbox

- Available in 5 frame sizes
- Input adapter suitable for servo motors
- Ratios 5:1 to 26:1
- Also available with shaft input (S-Series) which has 9 frame sizes and ratios 5:1 to 83:1

VL - Spiral Bevel with IEC Flange Input

- Available in 8 frame sizes from 65mm up to 260mm
- Input adapter suitable for IEC motor
- Keyed hollow input shaft
- Multiple shaft configurations offered

Rack and Pinion

- Helical and Straight tooth rack and pinion systems
- Common modules between 0.5mm and 6mm, with 22mm maximum
- Case-hardening, inductive hardening, and nitriding treatments available
