# SMAC-Motion™

Graphical User Interface

SMAC-Motion™ *LCC Control Center*

SMAC-Motion™ *Thread Check*

Graphical User Interface, **SMAC-Motion**™, provides a simple and straightforward way to quickly configure motion parameters of a variety of SMAC single/dual axis actuators and controllers.

- **No programming experience required**
- **Menu-driven, easy setup**
- **Pre-programmed with application-specific features**
- **Real time analysis**
- **Data and graphical feedback tools**
- **Built-in tutorial and help features**

SMAC-Motion™ Software Series
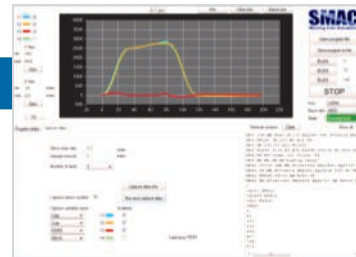

SMAC-Motion™
LCC Control Center

Achieve high level programming with no programming experience, monitoring and logging of parameters, fine-tuning of control parameters for LCC controller.

SMAC-Motion™
LAC-X Editor

Easy setup and tuning of control parameters for LAC-1, LAC-25, LAC-45 and Smart Driver.

## SMAC-Motion™
CBC Control Center

Easy setup and tuning of control parameters for miniature CBC controller integrated with SMAC actuators.

SMAC-Motion™
Thread Checking

Pre-installed, user configurable Thread-Checking applications. Fully automated 100% inspection of internal & external threads. Verification of counter bore height, thread pitch, oversized / undersized threads, cross thread and shallow thread, etc.

Coming Soon

SMAC-Motion™
Switch Testing

Pre-installed, user configurable Switch-Test applications. Fully automated 100% end of line and offline testing. Verification of travel, switch points and force / position profile of entire switch.
