## Excellent Technology for Evolving Industries

Harmonic Drive LLC engineers and manufactures precision servo actuators, gearheads and gear component sets. We work closely with companies of all sizes to understand their application requirements and provide a standard or custom-engineered solution to enable the success of their design project. Our mission is to provide motion control solutions that give our customers a competitive advantage.

With over 50 years of experience, our expert engineering and production teams develop enabling technologies and products to meet the needs of an evolving motion-control market. We are very proud of our outstanding company history.

Our high-precision, zero-backlash Harmonic Drive® actuators and gears have, and continue to play critical roles in robotics, spaceflight applications, semiconductor manufacturing equipment, factory automation equipment, medical diagnostics, and surgical robotics.

# Harmonic Drive® High-Precision Strain Wave Gearing

## Features

- Zero backlash
- High positioning accuracy
- High repeatability
- Compactness
- Light weight
- High reduction ratio
- High torque capacity
- High efficiency
- Quiet operation

## Structure

Utilizing a unique operating principle, the gear consists of only 3 basic parts (Wave Generator, Flexspline, and Circular Spline). It provides excellent features not found in other speed reducers.

### Wave Generator

The Wave Generator is a thin raced ball bearing fitted onto an elliptical hub. This serves as a high efficiency torque converter and is generally mounted onto the input or motor shaft.

### Flexspline

The Flexspline is a non-rigid, thin cylindrical cup with external teeth on the open end of the cup. The Flexspline fits over the Wave Generator and takes on its elliptical shape. The Flexspline is generally used as the output of the gear.

### Circular Spline

The Circular Spline is a rigid ring with internal teeth. It engages the teeth of the Flexspline across the major axis of the Wave Generator ellipse. The Circular Spline has two more teeth than the Flexspline and is generally mounted onto a housing.

## Operating Principle

The Flexspline is slightly smaller in diameter than the Circular Spline and usually has two fewer teeth than the Circular Spline. The elliptical shape of the Wave Generator causes the teeth of the Flexspline to engage the Circular Spline at two opposite regions across the major axis of the ellipse.

As the Wave Generator rotates the teeth of the Flexspline engage with the Circular Spline at the major axis. For every 180 degree clockwise movement of the Wave Generator the Flexspline rotates counter-clockwise by one tooth in relation to the Circular Spline.

One Turn of Wave Generator

Each complete clockwise rotation of the Wave Generator results in the Flexspline moving counter-clockwise by two teeth from its original position relative to the Circular Spline.

## Tooth engagement

The strain wave gear has a unique tooth engagement which results in a zero-backlash gear mesh that provides high positional accuracy and high torque with a compact form factor.

The Harmonic Drive® strain wave gear utilizes a unique gear tooth profile for optimized tooth engagement. Unlike an involute tooth profile, which is used in conventional gears, this optimized tooth profile ("S tooth") enables about 30% of the total number of teeth to be engaged at the same time. This technological innovation results in high torque, high torsional stiffness, long life and smooth rotation.

The "S" tooth profile eliminates stress concentration by widening the tooth root and providing a large tooth root radius. This figure shows the progression of the Flexspline tooth engagement as it meshes with the teeth of the fixed Circular Spline.

## Rotary Actuators

### AC Servomotors

Peak Torque (Nm)	Maximum Speed (rpm)
1.8~28	60~200
1.8~28	60~200

## Harmonic Drive® Precision Product

### Component

#### Component Gear Sets

Consisting of three basic components: flexspline, circular spline and wave generator; component gear sets offer ultimate design flexibility and can be tightly integrated in equipment sub-structures.

Component	Cup	Standard	CSF	Peak Torque (Nm)	Reduction Ratio
Cup	Standard	CSF		1.8~9200	30:1~160:1
	High-Torque	CSG		23~3400	50:1~160:1
	Ultra-Flat	CSD		12~750	50:1~120:1
Pancake	Standard	FB		3.2~500	50:1~160:1
	High-Torque	FR		5.4~7900	50:1~320:1
Silk Hat	Standard	SHF		9.0~1800	30:1~160:1
	High-Torque	SHG		23~3400	50:1~160:1

### Gear Unit

#### Gear Unit

Housed component gearing combined with precision cross roller output bearing & flange. Very compact, robust and easy to use gearhead solution.

Gear Unit	Cup	Standard	CSF-2UH	Peak Torque (Nm)	Reduction Ratio
Cup	Standard	CSF-2UH		9.0~2600	30:1~160:1
	Standard, Lightweight	CSF-2UH-LW		9.0~2600	30:1~160:1
	High-Torque	CSG-2UH		23~3400	50:1~160:1
	High-Torque, Lightweight	CSG-2UH-LW		23~3400	50:1~160:1
	High-Torque, Full Unit	CSG-2UK		127~3400	50:1~160:1
	Large Hollow Shaft	FBS-2UH		25~92	30:1~50:1
	Ultra-Flat	CSD-2UH		12~823	50:1~120:1
	Ultra-Flat	CSD-2UF		12~453	50:1~120:1
	Compact Mini	CSF-2XH		0.5~28	30:1~100:1
	Compact Mini, Double Shaft	CSF-1U		0.13~28	30:1~100:1
	Mini, Ultra-Flat	CSF-2UP		1.8~28	30:1~100:1
Silk Hat	Hollow Shaft	SHF-2UH		9.0~1800	30:1~160:1
	Hollow Shaft, Lightweight	SHF-2UH-LW		9.0~1800	30:1~160:1
	High-Torque, Hollow Shaft	SHG-2UH		23~3400	50:1~160:1
	High-Torque, Hollow Shaft, Lightweight	SHG-2UH-LW		23~3400	50:1~160:1
	Input Shaft	SHF-2UJ		9.0~1800	30:1~160:1
	High-Torque, Input Shaft	SHG-2UJ		23~3400	50:1~160:1
	Ultra-Flat, Hollow Shaft, Lightweight	SHD-2UH-LW		12~450	50:1~120:1

### Simplicity Gear Unit

#### Simplicity Gear Unit

Non-housed component gearing combined with a precision cross roller output bearing. Similar to Gear Units (above), without the housing and output flange, for tighter integration into the customer's housing or machine structure.

Simplicity Gear Unit	Silk Hat	Ultra-flat, Hollow shaft	SHD-2SH	Peak Torque (Nm)	Reduction Ratio
Simplicity Gear Unit	Ultra-flat, Hollow shaft	SHD-2SH		12~450	50:1~120:1
	Hollow Shaft	SHF-2SH		9.0~1800	30:1~160:1
	High-torque, Hollow shaft	SHG-2SH		23~3400	50:1~160:1
	Input coupling	SHF-2SO		9.0~1800	30:1~160:1
	High-torque, Input coupling	SHG-2SO		23~3400	50:1~160:1

### Phase Adjustment Unit

Phase Adjustment Unit	Coupling Indexer	Manual Phase Adjuster	HDI	Peak Torque (Nm)	Reduction Ratio
Phase Adjustment Unit	Manual Phase Adjuster	HDI		100~500	100:1
	Pancake	Differential	FD	23~3400	80:1~320:1
	1:1 Differential	FBB		28~655	80:1~160:1

## Quick Connect® Gearheads

### Gearhead

#### Planetary Gearing

### Gearhead

Gearhead	Cup	Standard	CSF-GH	Peak Torque (Nm)	Reduction Ratio	Motor Capacity (W)
Gearhead	Standard	CSF-GH		18~2600	50:1~160:1	30~5000
	High-torque	CSG-GH		23~3400	50:1~160:1	30~5000
Planetary Gearing	Standard	HPG		5~3200	3:1~50:1	10~15000
	High-torque	HPGP		12~3940	4:1~45:1	10~15000

## Brushless Actuators FHA-C Mini with Integrated Servo Drive

The FHA-C mini Series is a family of extremely compact actuators that deliver high torque with exceptional accuracy and repeatability. As part of the FHA-C mini family, an integrated servo drive version utilizing CANopen® communication is now available. This evolutionary product eliminates the need for an external drive and greatly improves wiring while retaining high-positional accuracy and torsional stiffness in a compact housing.

- Actuator + Integrated Servo Drive utilizing CANopen communication
- 24VDC Nominal +7-28VDC Supply Voltage Range
- Single Cable with only 4 wires needed: CANH, CANL, +24VDC, 0VDC
- Zero Backlash
- Dual Absolute Encoders
- Panel Mount Connectors with 4 exit options
- Output Sensing Encoder 14bit (16384 cpr) resolution
- Input Sensing Encoder 15bit (32768 cpr) resolution
- Control Modes Including Torque, Velocity, and Position Control, CSP, CSV, CST
- HDL Software

## HDL-IDE 3.0 Software:

HDL-IDE 3.0 software provides the ability to setup or commission the FHA-C Mini Integrated actuator without connecting to a CANopen master controller. A single actuator can connect to a personal computer or laptop with a CAN communication converter and a power supply. All 256 parameters, including the tuning parameters and 256 general user variables can be set and stored to be recognized by the CANopen master controller operating the specific application. The following are some of the features included in HDL-IDE 3.0 software:

## Features

- Torque Mode and Graph
- Velocity Mode and Graph
- Position Mode and Graph
- Homing Mode
  - Limit Switch
  - Current Position
  - Hardstop Homing
- Step Response
- Bode Plot
- Parameter List
- Virtual Mode (shown)
- Common Features for all Actuators

## Hollow Shaft Brushless Actuators FHA-C Mini Series

These servo actuators utilize Harmonic Drive® precision gears combined with a performance matched brushless servomotor and incremental encoder. The cube shaped form factor is very compact and features a through hole in the center of the shaft (incremental encoder version only).

The FHA-mini series is designed to operate with a wide range of third-party drives, as well as Harmonic Drive LLC's DDP Series and DCJ Series.

- Large center through hole (incremental version only)
- Compact design
- Body width from 50 mm to 75 mm
- Body length from 48.5 mm to 78 mm
- **NEW Option!** A pair of Single Turn Absolute Encoders for Input and Output Sensing
- **NEW Option!** Panel mount connectors

# Hollow Shaft Brushless Actuators

## FHA-C Series

These servo actuators utilize Harmonic Drive® precision gears combined with a performance matched brushless servo motor and incremental encoder. The FHA has a low profile form factor and features a hollow shaft through the center of the output. This hollow shaft feature may be used to pass cables, tubing or a laser beam through the axis of rotation.

The FHA series is designed to operate with a wide range of third-party drives, as well as Harmonic Drive LLC's DDP Series and RTL Series.

- High torque
- Large center through hole
- Compact cylindrical design
- New ratios, 80:1 and 120:1 added

Combined drive		HA-800 <sup>*</sup> -6C-200									

The values in the table above show typical values for the output shaft.

\*1: Typical values when used with HA-800 drive (driven with the ideal sine wave). (Ambient temperature: 25°C)

\*2: The values for saturated temperature were obtained when installed on an aluminum heatsink (17C: □300 x 15t, 25C: □350 x 18t, 32C: □400 x 20t, 40C: □500 x 25t [mm])

\*3: The values of the moment of inertia and weight were obtained while the product is not equipped with a brake.

\*4: The output axis resolution is obtained by (Motor shaft encoder resolution multiplied by four) x (Reduction ratio).

# Hollow Shaft Brushless Actuators FHA-C PR Series

FHA-C-PR features improved one way and bi-directional positioning repeatability and is ideal for high-precision rotary positioning. These servo actuators utilize Harmonic Drive® precision gears combined with a performance matched brushless servo motor and incremental encoder. The FHA has a low profile form factor and features a hollow shaft through the center of the output. This hollow shaft feature may be used to pass cables, tubing or a laser beam through the axis of rotation.

The FHA series is designed to operate with a wide range of third-party drives, as well as Harmonic Drive LLC's DDP Series and RTL Series.

- High torque
- Large center through hole
- Compact cylindrical design
- New ratios, 80:1 and 120:1 added

The values in the table above show typical values for the output shaft.

\*1: They are typical characteristics in the case of combinations with our drive (driven with the ideal sine wave). (Ambient temperature: 25°C)

\*2: The output axis resolution is obtained by (Motor shaft encoder resolution multiplied by four) x (Reduction ratio).

\*3: Mass (without brake)

# Hollow Shaft Brushless Actuators FHA-C H Series

FHA-C Series servo actuators are now available with IP65 protection. Four sizes are available: 17, 25, 32 and 40. The IP65 rated FHA-C actuator is ideal for harsh environments. With IP65 and 480V, the FHA actuator is well suited for machine tool, packaging, and wash-down applications.

- High torque
- Large center through hole
- Compact cylindrical design
- IP65 Rating
- 480VAC\*
- EnDat® & HIPERFACE® Encoder Protocols
- DESINA style flex rated cables

## Hollow Shaft Brushless Actuators SHA-CG Series

SHA-CG high precision actuators are a great alternative for direct drive motors. SHA-CG actuators offer direct drive motor performance in a compact, significantly lighter package. The SHA-CG offers improved rotary positioning accuracy and a high precision output with surface runout less than 10 microns.

- Alternative to Direct Drive Motors
- High Accuracy Output Bearing
- Available with Mounting Base
- High Torque
- Hollow Shaft Design
- Compact
- Available in 4 sizes

	SHA20A	SHA25A	SHA32A	SHA40A
1. Output shaft surface runout	10	10	10	10
2-1. Output shaft axial runout (Outside diameter)	10	10	10	10
2-2. Output shaft axial runout (Inside diameter)	15	15	15	15
3. Parallelism between the output shaft and actuator mounting surface	30	30	35	35
4. Parallelism between the output shaft and actuator mounting surface	40	40	45	45
5. Concentricity between the output shaft and actuator mounting diameter	50	50	55	60
6. Concentricity between the output shaft and actuator mounting diameter	60	60	65	70

Note: All values are T.I.R. (Total Indicator Reading).

## Hollow Shaft Brushless Actuators

### SHA-SG Series

SHA Series AC Servo Actuators provide high torque and highly accurate rotary operation. These servo actuators utilize Harmonic Drive® precision gears combined with a brushless servomotor and magnetic absolute encoder. The SHA Series is an advanced version of the FHA series AC Servo Actuators, featuring a larger hollow shaft with a smaller, outer diameter.

The SHA Series is designed to operate with REL Series and HA-800 drives.

- High torque
- Compact, slim design
- Large center through hole
- Low voltage winding available for SHA25A
- Size 45 now available

## Brushless Actuators FLA Series

The new ultra-flat, ultra-light brushless actuators combine our high-precision/high-performance reducers with a compact, high-output brushless DC motor. FLA actuators are available with our high-speed, high-efficiency Harmonic Planetary® gearhead or with our high-precision, high-torque Harmonic Drive® reducer.

- Ultra-Flat Shape
- Multiple Options Available: Three sizes, three ratios and two voltages
- Light Weight
- Designed to operate with a wide range of third-party servo drives

## Brushless Actuators RSF Supermini Series

These extremely small servo actuators utilize zero backlash Harmonic Drive® precision gears, a brushless servo motor and an incremental encoder to deliver precision motion control. The RSF Supermini series is designed to operate with a wide range of third party drives as well as Harmonic Drive LLC's DCJ Series, DDP Series and HA680 drives. The units are small enough to fit inside the finger of a robotic hand.

- Compact, lightweight
- High output torque
- High positional accuracy
- RSF-5B is available with an optional brake

		in-lb	-			0.16	0.26	0.39
Mass <sup>6</sup>	Without Brake	g	31.0(except clamp filter)			66.0(except clamp filter)		
	With Brake	g	-			86.0(except clamp filter)		
Recommended Drive	DC24V		DCJ-055-09/DDP-090-09			HA-680-4B-24		

**Notes:**

- The table shows typical output values of actuators.
- The values in the table above are obtained when it is combined with the HA-680-4B-24 drive.
- All values are typical.
- The moment of inertia is the total value of the motor shaft and the gear's moment of inertia values converted to the output side. The values in parentheses are for equipment with a brake.
- The quad encoder resolution is (motor shaft encoder resolution when multiplied by 4) x (gear ratio).
- The weight of clamp filter is 6g each.

# Brushless Actuators RSF-Mini Series

These brushless servo actuators utilize zero backlash Harmonic Drive® precision gears for precise motion control. The RSF Mini Series is designed to operate with a wide range of third party drives as well as Harmonic Drive LLC's DCJ Series, DDP Series and HA680 drives.

- Exceptional positional accuracy
- Compact design
- High-rotational accuracy
- High resolution

## Brushless Actuators RSF Series

The RSF series servo actuator combines a high performance brushless servomotor with a high accuracy Harmonic Drive® gearhead. When combined with a performance matched servo drive, the RSF actuator delivers precise, reliable motion control for machines requiring both high torque and long life. The RSF Series is designed to operate with a wide range of third party drives as well as Harmonic Drive LLC's RTL Series, and REL Series.

- Zero backlash
- Compact and lightweight
- High power
- High positioning and high rotational accuracy

# Brushless Actuators RKF Series

The RKF series is a compact servo actuator. It combines a zero backlash Harmonic Drive® gear and an AC servo motor. The RKF Series is designed to operate with a wide range of third party drives as well as Harmonic Drive LLC's RTL Series, and REL Series.

- Compact and lightweight
- High power
- High positioning and high rotational accuracy

## DC Servo Actuators RH Mini Series

This RH Mini Series is a DC servo actuator incorporating a Harmonic Drive® precision gear, a high performance brush DC servomotor and an incremental encoder.

- Zero backlash
- High torque
- High-positional accuracy
- Compact design
- Lightweight
- High powered
- High-precision bearings

# Direct Drive Motor KDU Series

The KDU Series are Direct Drive Motors which achieve 10 arc•sec positioning accuracy as well as  $\pm 0.5$  arc-sec repeatability with a resolution of 0.16 arc•sec. Also, the KDU has a large Hollow Shaft design which allows cables, shafts or lasers to pass through the axis of rotation.

- Exceptional positional accuracy
- Exceptional repeatability
- Ultra high resolution

## Precision Linear Actuators LBC Series

The precision lead screw provides positioning accuracy in the micron range with sub-micron repeatability. The actuator is capable of thrust forces up to 12,000 N. This product is useful for precise positioning of heavy loads or applications where high force is required such as molding equipment or precision presses.

- 12,000 N Force
- 0.32  $\mu\text{m}$  positioning resolution
- Brushless servomotor with incremental encoder
- Integral Limit Switches

# LAH Series

A precision ball screw provides positioning accuracy better than 4 microns and repeatability of 1 micron.

This product is well suited for measuring instruments, test and inspection systems, optical equipment, semiconductor and LCD manufacturing equipment.

- 392 to 3000 N Force
- 4 micron positioning accuracy

## Galvano Optical Scanners

### LSA Series

Galvanometric Laser Scanning Actuator. LSA laser scanning actuators are Galvanometric scanners capable of scanning at high speed with high precision. A newly developed optical sensor and our unique moving magnet motors are used in the LSA Series laser scanning actuators

- High response frequency
- High accuracy / repeatability
- Continuous scanning or discrete pointing

# Cup Type CSF Series

The Harmonic Drive® CSF gears can be directly integrated into your machinery/ equipment. Available in a variety of sizes and ratios, you can select the model that is most suitable for your needs.

- Zero backlash
- Compact design
- High torque capacity
- High torsional stiffness
- High positioning accuracy
- Housed configuration is available (see p. 42)

$L_{10}$  Life: 7,000 h

# Cup Type - High Torque CSG Series

CSG is available in 10 sizes with gear reduction ratios from 50:1 to 160:1. CSG high torque series was based on our CSF standard torque series with the goal of upgrading load capacity, strength & reliability and extending service life.

- Zero backlash
- Compact and simple design
- High torque capacity
- High torsional stiffness
- High positioning accuracy
- Housed unit type is available (see p. 44)
- 30% higher torque than CSF

$L_{10}$  Life: 10,000 h

Cup Type - Super Flat  
**CSD Series**

The ultra-flat CSD precision gears are available in seven sizes, opening up new applications for motion control speed reducers.

- Zero backlash
- Extremely high positioning accuracy
- Excellent Repeatability
- Superior axial compactness
- Hollow through bore, also available with extra large through bore

$L_{10}$  Life: 7,000h

# FB and FR Series

Pancake gears consist of four main parts: Wave Generator, Flexspline, Dynamic Spline, and Circular Spline. Extremely flat, these pancake gears offer the design engineer high ratios in extremely compact configurations.

- Flat profile
- Easily adapted to customer supplied assembly
- FB uses single wave generator bearing
- FR is heavy duty version of the FB
- FR uses double wave generator bearing

$L_{10}$  Life: 3,000 h

## Silk Hat SHF Series

SHF is a silk hat, component set gear available with a large hollow through bore. It provides exceptional positioning accuracy in a compact design.

- Zero backlash
- Hollow bore units available
- Compact and simple design
- High torque capacity
- High positioning accuracy
- High torsional stiffness

$L_{10}$  Life: 7,000 h

Gear Unit

CSF-2UH Series

CSF-2UH is a housed component gear set combined with a precision cross roller output bearing & flange. It is a very compact, robust and easy to use gearhead solution.

- Zero backlash
- Compact and simple design
- High torque capacity
- High torsional stiffness
- High positioning accuracy

$L_{10}$  Life: 7,000h

- "Basic dynamic rated load" is a constant stationary radial load that achieves a basic dynamic rated life of the bearing of one million revolutions.
- "Basic static rated load" is a static load that achieves a contact stress of a constant level (408kN/mm<sup>2</sup>) at the center of a contact zone between the rolling element receiving a maximum load and track.
- The moment stiffnesses are mean values.

# Lightweight Gear Unit

## CSF-2UH-LW Series

LW indicates lightweight, the CSF-2UH is a housed component gear set combined with a precision cross roller output bearing & flange.

- Zero Backlash
- 30% average lower weight than Standard Series
- High Torque to Weight ratio
- Accuracy <1 arc-min
- High torsional stiffness
- High efficiency
- Robust cross roller output bearing
- Output flange for direct mounting of load

**L<sub>10</sub> Life: 7,000h**

# High Torque Gear Unit CSG-2UH Series

CSG-2UH is a high torque housed component gear set combined with a precision cross roller output bearing & flange. It is a very compact, robust and easy to use gearhead solution.

- Zero backlash
- High torque capacity
- High torsional stiffness
- Compact and simple design
- High positioning accuracy
- 30% higher torque than a CSF unit

**L<sub>10</sub> Life: 10,000 h**

# High Torque Gear Unit CSG-2UK Series

CSG-2UK is a high torque fully sealed, high accuracy gear reducer ideally suited for machine tool applications.

- Zero backlash
- Compatible with Fanuc motors
- High torque capacity
- High torsional stiffness
- High positioning accuracy

**L<sub>10</sub> Life: 10,000 h**

- "Basic dynamic rated load" is a constant stationary radial load that achieves a basic dynamic rated life of the bearing of one million revolutions.
- "Basic static rated load" is a static load that achieves a contact stress of a constant level (408kN/mm<sup>2</sup>) at the center of a contact zone between the rolling element receiving a maximum load and track.
- The moment stiffnesses are mean values.

# Large, Hollow-Shaft FBS-2UH Series

This new Harmonic Drive® gear features a large, hollow shaft with a compact outer diameter. An extra large hollow shaft is ideal for robots and machines requiring complex cabling to pass through the axis of rotation. The new gear design features Harmonic Drive's "S" tooth profile for optimal tooth engagement resulting in high torque, high-torsional stiffness, long life and smooth rotation. The new FBS Series is available in two sizes (25, 32) and two ratios (30:1, 50:1).

- Extra large hollow-shaft diameter is our largest yet for a standard product
- Compact dimensions for use in robotics
- Outer diameter and hollow bore optimized for design flexibility and performance

**Compact Gearhead**

**CSF Mini and Supermini Series**

CSF-1U

CSF-2XH

CSF mini gearheads provide high positioning accuracy in a super-compact package. Compact 4-point contact ball bearing is mounted in the main shaft. Available in five sizes and four ratios, the CSF mini gearheads feature shaft or flange outputs.

- Zero backlash
- High positioning accuracy
- Compact and lightweight
- High torque capacity
- High radial, axial, and moment load capacity
- 4 point contact bearing
- Ratios: 30:1 to 100:1
- Flange output, shaft output, shaft input and output

# Ultra-Flat Compact Gearhead CSF-2UP Mini Series

The CSF-2UP gear units have an ultra-flat configuration with high-moment stiffness. The new models are lightweight and extremely flat. Thanks to a cross roller bearing used at the output flange, the CSF-2UP gearheads offer high-moment stiffness.

- Zero backlash
- High positioning accuracy
- Compact and lightweight
- High torque capacity
- High radial, axial, and moment load capacity
- Cross roller bearing
- Ratios: 30:1 to 100:1

$L_{10}$  Life: 7,000 h

## Gear unit with hollow shaft or solid input shaft

## SHF-2UH/2UJ Series

Incorporating a Harmonic Drive® gear component into an integral housing, the SHF-2UH is a compact hollow shaft gearhead with zero backlash.

- Zero backlash
- Large hollow through bore (2UH)
- High positioning accuracy
- Compact and simple design
- High torque capacity
- High torsional stiffness
- Shaft input units available (SHF-2UJ)

**L<sub>10</sub> Life: 7,000h**

• "Basic dynamic rated load" is a constant stationary radial load that achieves a basic dynamic rated life of the bearing of one million revolutions. "Basic static rated load" is a static load that achieves a contact stress of a constant level (408kN/mm<sup>2</sup>) at the center of a contact zone between the rolling element receiving a maximum load and track.

# SHF-2UH-LW Series

LW indicates lightweight. Incorporating a Harmonic Drive® gear component into an integral housing, the SHF-2UH-LW is a lightweight, compact hollow shaft gearhead with zero backlash.

- Zero backlash
- 20% lighter than standard unit
- Large hollow through bore
- High positioning accuracy
- High torque capacity
- High torsional stiffness

**L<sub>10</sub> Life: 7,000h**

## High torque gear unit with hollow shaft or solid input shaft

## SHG-2UH /2UJ Series

The SHG-2UH series with a hollow shaft is a high torque, compact, precision gearhead with zero backlash and exceptional accuracy and repeatability.

- Zero backlash
- Large hollow through bore (2UH)
- High positioning accuracy
- High torque capacity
- High torsional stiffness
- Shaft input units available (SHG-2UJ)
- 30% increased torque compared to SHF Units

**L<sub>10</sub> Life: 10,000 h**

\*1: "Basic dynamic rated load" is a constant stationary radial load that achieves a basic dynamic rated life of the bearing of one million revolutions.

\*2: "Basic static rated load" is a static load that achieves a contact stress of a constant level (408kN/mm<sup>2</sup>) at the center of a contact zone between the rolling element receiving a maximum load and track.

## Lightweight, Hollow Shaft SHD-2UH-LW Series

LW indicates lightweight. Axially compact, these gear units feature a large hollow input shaft and a robust cross roller bearing so loads can be mounted directly to the unit without the need for additional support bearings.

- Zero Backlash
- Ultra-flat design
- Large Hollow Input Shaft
- Accuracy <1 arc-min (most sizes)
- Rigid cross roller output bearing
- Lightweight

$L_{10}$  Life: 7,000h

# Hollow Shaft, Simplicity Unit SHD-2SH Series

Axially compact, these gear units feature a large hollow input shaft and a robust cross roller bearing so loads can be mounted directly to the unit without the need for additional support bearings.

- Zero backlash
- Extremely flat profile
- Hollow through bore
- High positioning accuracy
- High stiffness cross roller bearing output
- High radial, axial, and moment load capacity

**L<sub>10</sub> Life: 7,000h**

## Simplicity gear unit

## SHF-2SH/2SO Series

Simplicity Gear Units are Non-housed component gears combined with a precision cross roller output bearing. Simplicity Gear Units do not include the housing and output flange, which allows for even tighter integration into the customer's housing or machine structure.

- Zero backlash
- High positioning accuracy
- Compact and simple design
- High torque capacity
- High torsional stiffness

$L_{10}$  Life: 7,000h

• "Basic dynamic rated load" is a constant stationary radial load that achieves a basic dynamic rated life of the bearing of one million revolutions.  
 "Basic static rated load" is a static load that achieves a contact stress of a constant level (408kN/mm<sup>2</sup>) at the center of a contact zone between the rolling element receiving a maximum load and track.

# Phasing Differential FD-2 Series Component

The FD series is an extremely compact differential unit that allows you to fine-tune the phase and timing during operation.

- Pancake
- Ultra compact differential unit
- Backlash is very small and unit requires no assembly adjustment

# FD-0 Series Unit Type

The FD series is an extremely compact differential unit that allows you to fine-tune the phase and timing during operation. The unit type is provided with the housing so additional gears or pulleys required for the machine can be directly mounted onto it.

- Pancake
- Ultra compact differential unit
- Backlash is very small and unit requires no assembly adjustment

# Phasing Differential FBB Series

The FBB was developed as a versatile simple differential drive transmission for direct phasing of rotating elements while they are in motion. Offsetting internal gear ratios deliver a through ratio of 1:1 and trim adjustments can be applied through one or both of two wave generators.

- 1:1 phasing differential between input and output
- High ratio trim adjustment
- Compact, low backlash design for end roll mounting

# HDI Infnit-Indexer® Phase Adjuster

Infnit-Indexer® phase adjusters are available from stock in the standard bore sizes shown with keyways, set screws, and tapped holes for face mounting of either hub. It is possible for the user to modify these configurations by disassembling the unit. The hub material is low carbon steel with suitable sizes shown in notes to the dimensional drawings. Additional sizes and configurations are available by special order.

- Fine tune rotational position of shafts and machine parts
- Phase cams
- Adjust roll registration
- Take up backlash in spur and worm gears
- Synchronize indexing devices

## •3 Models, 6 Bore Sizes Available From Stock

HDI Size	Bore Size	O.D.	Length	Torque Capacity
-10	1/2" 5/8" 3/4"	2 3/8" (60.33mm)	1 11/16" (42.9mm)	1000 lb-in (113 Nm)
-25	3/4" 1"	3" (76.2mm)	2 3/16" (76.2mm)	2500 lb-in (283 Nm)
-50	1 1/4"	3 3/4" (95.3mm)	2 3/8" (95.3mm)	5000 lb-in (565 Nm)

To operate, hand rotate the adjusting ring in either direction to produce a 100:1 reduction between the ring and the output. Adjust the friction adjustment/locking screw to desired resistance. For some applications, one adjustment will be sufficient for both shaft turning and phase adjusting modes. For more severe loading, such as hard stops or high peak torque situations, the friction adjustment/locking screw may be used to lock the adjusting ring in place to maintain phase.

## Quick Connect® Gearhead for Servomotors CSF-GH Series

CSF-GH Quick Connect® gearheads with zero-backlash Harmonic Drive® gearing are available with high reduction ratios, 50:1 to 160:1. CSF-GH utilizes our proprietary S tooth profile and provides high precision positioning (repeatability  $\pm 4$  to  $\pm 10$  arc-sec).

- Zero Backlash
- Available in 5 Sizes
- Peak torque 18Nm ~ 2630Nm
- Ratios, 50:1 to 160:1
- Accuracy <1 arc-min
- High Efficiency
- High load capacity output bearing
- Motor size range 30W to 5,000W

$L_{10}$  Life: 7,000h

• "Basic dynamic rated load" is a constant stationary radial load that achieves a basic dynamic rated life of the bearing of one million revolutions.  
 • "Basic static rated load" is a static load that achieves a contact stress of a constant level (4kN/mm<sup>2</sup>) at the center of a contact zone between the rolling element receiving a maximum load and track.

# CSG-GH Series

CSG-GH high-torque Quick Connect® gearheads with zero backlash Harmonic Drive® gearing are available with high reduction ratios, 50:1 to 160:1.

- Zero Backlash
- Available in 5 Sizes
- Peak torque 23Nm ~ 3419Nm
- Ratios, 50:1 to 160:1
- Accuracy <1 arc-min
- High Efficiency
- High load capacity output bearing
- Motor size range 30W to 5,000W
- 30% higher rated torque, repeated peak torque & maximum momentary torque than CSF series products of the same size

**L<sub>10</sub> Life: 10,000 h**

# Harmonic Planetary® Gearhead Quick Connect® Coupling HPG Series

Quick Connect® gearhead for high performance servo motors. Reduction ratios 3:1 to 50:1. Available with flange output, straight shaft (without key), straight shaft (with key) and center tapped hole.

- Low backlash: Less than 3 arc-min (less than 1 arc-min optional)
- Ratios: 3:1 to 50:1
- Quick Connect® coupling
- Peak torque: 5Nm ~ 3200Nm
- High moment capacity cross roller output bearing
- High efficiency
- Sealed structure
- Motor size range 10W to 15kW

**L<sub>10</sub> Life: 20,000 h**

# HPG Helical Series

Quick Connect® gearhead for high performance servo motors. Reduction ratios 3:1 to 10:1. Available with flange output, straight shaft (without key), straight shaft (with key) and center tapped hole.

- Helical Gearing
- Available in four Frame Sizes
- Peak Torque: 5Nm to 400Nm
- Ratios: 3,4,5,6,7,8,9 and 10:1
- High Efficiency
- Backlash <3 arc-min (<1arc-min available as an option)
- Repeatability ±20 arc-sec
- High load capacity Cross Roller output bearing
- Quick Connect® coupling for easy mounting of any motor

L<sub>10</sub> Life: 20,000 h

Harmonic Planetary® Gearhead  
Quick Connect® Coupling  
**HPGP Series**

High torque Quick Connect® gearhead for high performance servo motors. Reduction ratios 4:1 to 45:1. Available with flange output, Straight shaft (without key), Straight shaft (with key) and center tapped hole.

- Peak torque 12Nm ~ 3940Nm
- High precision
- Backlash <1 arc-min is available (size #14-65) (Standard backlash specification is < 3 arc-min)
- Cross roller bearing for high load capacity and moment stiffness
- Quick Connect® coupling
- Ratios, Single Stage: 4:1 to 5:1, Two Stage: 11:1 to 45:1
- Motor size range 10W to 15kW

**L<sub>10</sub> Life: 20,000h**

**Right Angle Harmonic Planetary® Gearhead  
Quick Connect® Coupling  
HPG RA Series**

Right angle, high precision, Harmonic Planetary® gearhead with low backlash.

- High precision Planetary gearhead
- Low backlash: Less than 3 arc-min (less than 1 arc-min optional)
- Quick Connect® coupling
- High torque capacity
- High moment capacity cross roller output bearing
- Right angle configuration allows for use in limited space

**L<sub>10</sub> Life: 20,000 h**

\* Left side description: The limited length of the Motor shaft is 81mm. Right side description: The limited length of the Motor shaft is 116mm.

Note: Dimensions F & G depend on the chosen Motor flange square size. Contact Harmonic Drive LLC for special flange motor combination.

# Harmonic Planetary® Gearhead Quick Connect® Coupling HPN-A Series

HPN value series planetary gearheads feature a robust design utilizing helical gears for quiet performance and long life. These gearheads are available with short lead times and are designed to couple to any servo motor with our Quick Connect® coupling system.

- Peak torque 9Nm to 752Nm
- Compact design
- High precision
- Backlash <5 arc-min (One-stage) , < 7 arc-min (Two-stage)
- Quick Connect® coupling system
- Reduction ratios between 3:1 and 50:1
- Helical gears for quiet performance
- Motor size range 30W to 7.5kw
- Quick delivery

**L<sub>50</sub> Life: 20,000 h**

Harmonic Planetary® Gearhead  
Quick Connect® Coupling

HPN-RA Series

HPN Right Angle value series planetary gearheads feature a robust design utilizing helical gears for quiet performance and long life. These gearheads are available with short lead times and are designed to couple to any servo motor with our Quick Connect® coupling.

- Peak torque 9Nm to 752Nm
- Backlash <6 arc-min (One-stage) , <9 arc-min (Two-stage)
- Quick Connect® coupling
- Reduction ratios between 3:1 and 50:1
- Helical gears for quiet performance

# Hollow Shaft Planetary Gear HPF Series

Hollow shaft planetary gear with output flange. The flange is integrated with a robust cross-roller bearing which can support high axial, radial and moment loads without the need for additional support bearings.

- Hollow Shaft Structure
- Coaxial input and output shafts
- Cross Roller Output Bearing
- Backlash < 3 arc-min
- The precision HPF planetary gear is also available in our SHA Series Hollow Shaft Brushless Actuators as a standard product

**L<sub>10</sub> Life: 20,000 h**

## •HPF Series Ratings

Size	Item	Ratio	Rated Torque		Limit for Repeated Peak Torque		Limit for Momentary Torque	
			Nm	In-lb	Nm	In-lb	Nm	In-lb
25		11	21	186	100	885	170	1505
32		11	44	389	220	1947	450	3983

## • Cross Roller Bearing Specification

Size	Item	Basic Rated Load				Allowable Moment Load Mc		Moment Stiffness Km	
		Basic Dynamic Rated Load C		Basic Static Rated Load Co					
		N	lb	N	lb	Nm	In-lb	x10 <sup>4</sup> Nm/rad	In-lb/arc.min
25		11400	2563	20300	4564	410	3629	37.9	335
32		22500	5058	39900	8970	932	8249	86.1	762

\*\*1: "Basic dynamic rated load" is a constant stationary radial load that achieves a basic dynamic rated life of the bearing of one million revolutions.

\*\*2: "Basic static rated load" is a static load that achieves a contact stress of a constant level (408kN/mm<sup>2</sup>) at the center of a contact zone between the rolling element receiving a maximum load and track.

Harmonic Planetary® Gearhead  
Quick Connect® Coupling

# HPG Rack and Pinion Assembly

High accuracy helical rack and pinion sets are designed for high positioning accuracy and low noise. By having complete control over the design of the system, Harmonic Drive delivers max power density with high linear stiffness and high precision. The RK systems from Harmonic Drive are ideal for CNC machining centers, metal cutting machines, laser machines and high-precision milling machines.

- High-Precision Planetary Gearhead HPG Series + Rack & Pinion
- High accuracy helical rack and pinion
- Higher positioning accuracy
- Runout accuracy of the pinion gear installed on the gearhead is 15µm or less
- Low noise and vibration due to ground finish helical rack and pinion
