Linear Motion. Optimized.™

Thomson - Your Source for Miniature Machine Components

A single source for miniature components engineered to work together

Thomson produces the widest selection of miniature linear and rotary components that are engineered to work together. This equates to faster design times, less installation problems, and higher performance and reliability.

The Thomson family of miniature products provide linear thrust and guidance or rotary motion control in the smallest packages available. They all benefit from Thomson's long experience in motion control engineering and have all the advantages and features offered for standard size products.

Thomson also provides customized solutions. Whether you need alternative materials, customized nut geometry, custom configured bearings, special end machining or mounting features, Thomson has the solution.

Miniature Metric Linear Bearings

NEW PRODUCT!

Compact and cost competitive, these new bearings can help bring high performance linear guidance to miniature equipment.

Miniature Metric Rolled Ball Screws

NEW PRODUCT!

The new line of rolled ball screws from Thomson are designed to offer industry leading capacity, smoothness and quiet operation. The design allows for simple customization and cost effectiveness.

GlideScrew™

NEW PRODUCT!

By combining a lead screw and a linear guide, the GlideScrew allows designers makers to reduce the footprint of their equipment, improve uptime and reduce cost of ownership of the end product.

The Thomson Advantage

Smaller components enable designers to reduce the size and weight of their end product, resulting in products that are smaller, lighter, and less expensive to produce. A smaller product will also reduce packaging and transportation cost, while lessening the overall environmental impact of the equipment. Choosing Thomson as your supplier brings some additional advantages as well.

Thomson Advantages	
Advantage	Benefits
Widest variety of miniature linear products on the market	<ul style="list-style-type: none"> • Expedited design time • Single source of engineering support • Consolidated supply base
Products designed to work together	<ul style="list-style-type: none"> • Online sizing and selection tools for easy design • Fewer installation problems • Higher performance equipment
Easy customization	<ul style="list-style-type: none"> • Custom sizes, finishes, materials and more • Optimized cost, size and performance
Geniune Thomson quality	<ul style="list-style-type: none"> • Fewer defects and field failures • Lower overall cost of ownership
Global company	<ul style="list-style-type: none"> • Sales and support around the globe • Safe partner with proven track record • Knowledge about local standards and preferences

Miniature Lead Screws

Thomson is a global leader in lead screw technology. Our broad offering, high quality and ability to customize set Thomson apart.

Miniature Brakes

Thomson Deltran Power-off brakes have been providing low cost, high performance solutions in small diameters for over 45 years. We offer brakes with the highest torque to diameter ratios on the market.

Miniature Linear Motion Systems

Thomson was the first company in the world to present a linear motion system. Today we offer a large range of different models including miniature sizes.

Customization

Thomson offers customized solutions for all our products. The customization can be anything from a minor adjustment to a completely new design. See page 15 or contact us for more information!

Miniature Components and Systems Overview

Linear Motion Miniature Products Overview*

Product Image	Product Group	Product Line Name (Product Suffix)	See Page	Basic Specifications	
	Lead Screws	Thomson BSA Lead Screw and MTS Flange Mount Supernut (MTS)	8	6 – 20 mm 3/16 – 3/4 in.	
		Thomson BSA Lead Screw and AFT Anti-Backlash Supernut (AFT)	8	10 mm 3/8 – 1/2 in.	
		Thomson BSA Lead Screw and XC Anti-Backlash Supernut (XC)	8	6 – 24 mm 3/16 – 1 in.	
	Ball Screws	Miniature Metric Rolled (TSI)	9 NEW!	6 – 14 mm	
	Linear Bearings	60 Case™ Linear Race Shafting and Miniature Instrument Bearing (INST)	10	1/8 – 1/4 in.	
		60 Case™ Linear Race Shafting and Miniature Metric Bearing (MM)	10 NEW!	3 – 12 mm	
		60 Case™ Linear Race Shafting and Super Ball Bushing Bearing (SP)	10	12 – 40 mm 1/2 – 1-1/2 in.	
	Profile Rail Guides	Microguide™ (TSR)	11	5 – 15 mm	
	Glide Screws	GlideScrew™ (GS)	12 NEW!	4 – 10 mm 3/16 – 3/8 in.	
	Linear Motion Systems	MicroStage® (MS)	13	MS25: 50 x 25 MS33: 60 x 33	

Rotary Motion Miniature Products Overview*

	Product Group	Product Line Name (Product Suffix)	See Page	Basic Specifications	
	Brakes	Metric Power-off Brake (MBRP)	14	37 – 75 mm	
		Spring-set Power-off Brake (FSB)	14	34.8 – 44.5 mm

*These are a small selection from our standard product ranges. More product ranges are available and most products also come in additional sizes and versions. Thomson specializes in making customized products to meet your exact specifications. See page 15 for more information.

Applications

Miniature linear motion components are ideal for applications where precise movement of small loads is critical. In particular, they add value in instruments for medical diagnostics, test and measurement equipment and engraving and printing, as well as a broad range of fluid pumping and pick-and-place applications.

Fluid Pumping

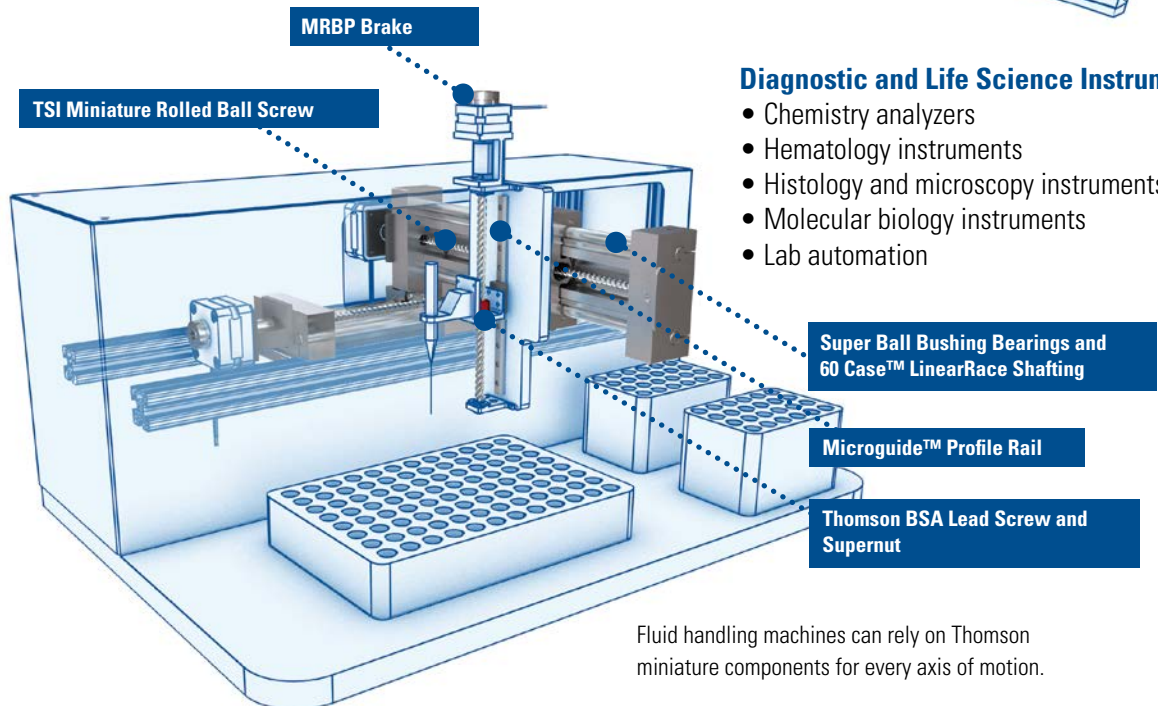

- Medical infusion pumps
- Industrial fluid pumps
- Lubrication pumps
- Syringe pumps

Fluid pumps benefit from the smooth, precise motion of Thomson miniature components.

Thomson BSA Lead Screw and AFT Supernut

Miniature Metric Bearing and 60 Case LinearRace Shafting

TSI Miniature Rolled Ball Screw

MRBP Brake

Super Ball Bushing Bearings and 60 Case LinearRace Shafting

Microguide Profile Rail

Thomson BSA Lead Screw and Supernut

Diagnostic and Life Science Instruments

- Chemistry analyzers
- Hematology instruments
- Histology and microscopy instruments
- Molecular biology instruments
- Lab automation

Fluid handling machines can rely on Thomson miniature components for every axis of motion.

Applications

Test and Measurement Equipment

- Torque testers
- Load and pull testers

Cap tightening/inspection machines utilize a system of miniature Thomson components that have been engineered to work together, thereby reducing design time and overall time to market.

Robotics and Pick & Place Equipment

- Engraving, scanning, and printing machines
- Electronics manufacturing equipment
- Medical surgery manipulators/robots
- Manipulators for use in hazardous areas
- Camera inspection equipment

MicroStage® Linear Motion System

GlideScrew™

Thomson provides custom sizes, finishes, and materials for engraving/printing machines to deliver an optimized solution.

Other Applications

- Portable installations (e.g. bedside scanner)
- Portable ventilators
- Dosage equipment
- Electronics manufacturing equipment
- Inspection, scanning, and printing equipment
- Packaging and dispensing equipment
- Aerospace and defence applications
- Vending machines

Lead Screws

Thomson BSA Lead Screw and Supernut MTS, AFT, and XC

Main Features

Thomson BSA Lead Screw

- Lead accuracy up to 0.003 in/ft
- Highly customizable solutions for OEM applications
- Precision screw machining
- Optional materials and coatings available

Supernut MTS

- Excellent lubricity and dimensional stability
- Cost effective manufacturing including integral flange

Supernut AFT

- Designed for light load applications
- Offers smooth movement and low drag torque
- Anti-backlash adjusts for wear for the life of the nut

Supernut XC

- Utilizes Thomson BSA patented ActiveCAM technology
- Offers low drag torque and high axial stiffness
- Anti-backlash insures consistent performance and repeatability

Maintenance		designed to minimize preventative maintenance		

Ball Screws

Miniature Metric Rolled Ball Screw TSI

Main Features

- Design maximizes load capacity
- Quiet and smooth performance
- Flexible ball nut mounting configurations and rapid prototyping
- Exceeding 100 % more capacity than competition in most size
- Higher load capacity equates to longer life
- Precision rolled screws to T7 accuracy class

(1) L10 life is based on one million revolutions.

Linear Bearings

60 Case™ Linear Race Shafting and Linear Bearing INST, MM, and SP

Main Features

60 Case Linear Race Shafting

- Manufactured to the highest quality standards
- Different materials, surface treatments, and special machining available

Miniature Instrument Bearing (INST)

- Very high accuracy and responsiveness
- For smaller loads

Miniature Metric Bearing (MM)

- Light and compact
- Up to 27 times longer life than conventional linear bearings

Super Ball Bushing Bearing (SP)

- Low cost, easy to install and long life
- Industry standard for self-aligning linear bearings

Profile Rail Guides

Microguide™ TSR

Main Features

- Low profile
- Comes in two profile styles - standard and wide
- Available in two accuracy classes - H and P
- Very quiet and smooth operation
- Low weight
- Industry standard, drop-in replacement
- High moment load capacity
- Two track gothic arch ball groove geometry enables single rail application

Maintenance		little or no lubrication								

Glide Screws

Glide Screw™ GS

Main Features

- Lead screw and linear bearing combined
- Aligned from factory
- Side load and moment load capable
- Integrated lubrication block - no maintenance required
- Smooth and quiet motion
- Cylindrical or flanged nuts available
- Versions for high temperature, clean room and food grade applications available

Maintenance		lubrication of screws and guides	

Brakes

Power-off Brakes, MBPR, and FSB

Main Features

MBRP series

- Spring-set electromagnetic power-off brake
- Five frame sizes
- Low cost
- Simple installation
- Superior torque to size ratio
- Energy efficient
- Optional manual release lever available
- UL recognized component

FSB series

- Spring-set electromagnetic power-off brake
- Two frame sizes
- Low cost
- Simple installation
- Superior torque to size ratio
- Energy efficient

Customization

Applications often have unique challenges that cannot always be solved by an off-the-shelf solution. Thomson specializes in providing custom engineered solutions quickly and cost effectively to address these requirements.

Thomson has proven that custom designs can offer the optimum performance and overall cost. 3D CAD design, rapid prototyping and flexible manufacturing have made customization a faster process, once the product is ready and approved it will be manufactured and shipped as quickly as a standard product.

A selection of custom lead screw nuts

Selection of Customization Possibilities

Type of customization	Examples
Custom materials	<ul style="list-style-type: none"> • Stainless steel bearings or an aluminium/plastic housing • Nuts or bushings made in a special metal, plastic, composite or ceramic material • Replacement of hardware to meet demands in special environments
Custom surface treatment	<ul style="list-style-type: none"> • Paint of different quality or/and color • Thicker anodization on aluminum parts • Specially coated screws or sliding surfaces (PTFE, chrome, black oxide, etc.)
Custom size or geometry	<ul style="list-style-type: none"> • Non standard stroke lengths • Custom end machining or motor/mounting interfaces • Special nut, carriage or flange designs
Custom assemblies	<ul style="list-style-type: none"> • Product shipped with mounting brackets, gearboxes or/and motors mounted • Product shipped in parts or sub assemblies for the customer to assemble • Product shipped mounted to the customers equipment
Custom services	<ul style="list-style-type: none"> • Special lubrication • Special stocking or transportation program • Training of engineers, maintenance or other personnel • Special service, repair or/and maintenance program • Special packaging, testing, certification or quality control procedures • Engineering evaluation
New designs	<ul style="list-style-type: none"> • Change or combine one or several products in to a new product • Clean sheet designs
