WAGO-I/O-SYSTEM

WebVisu Mobile App
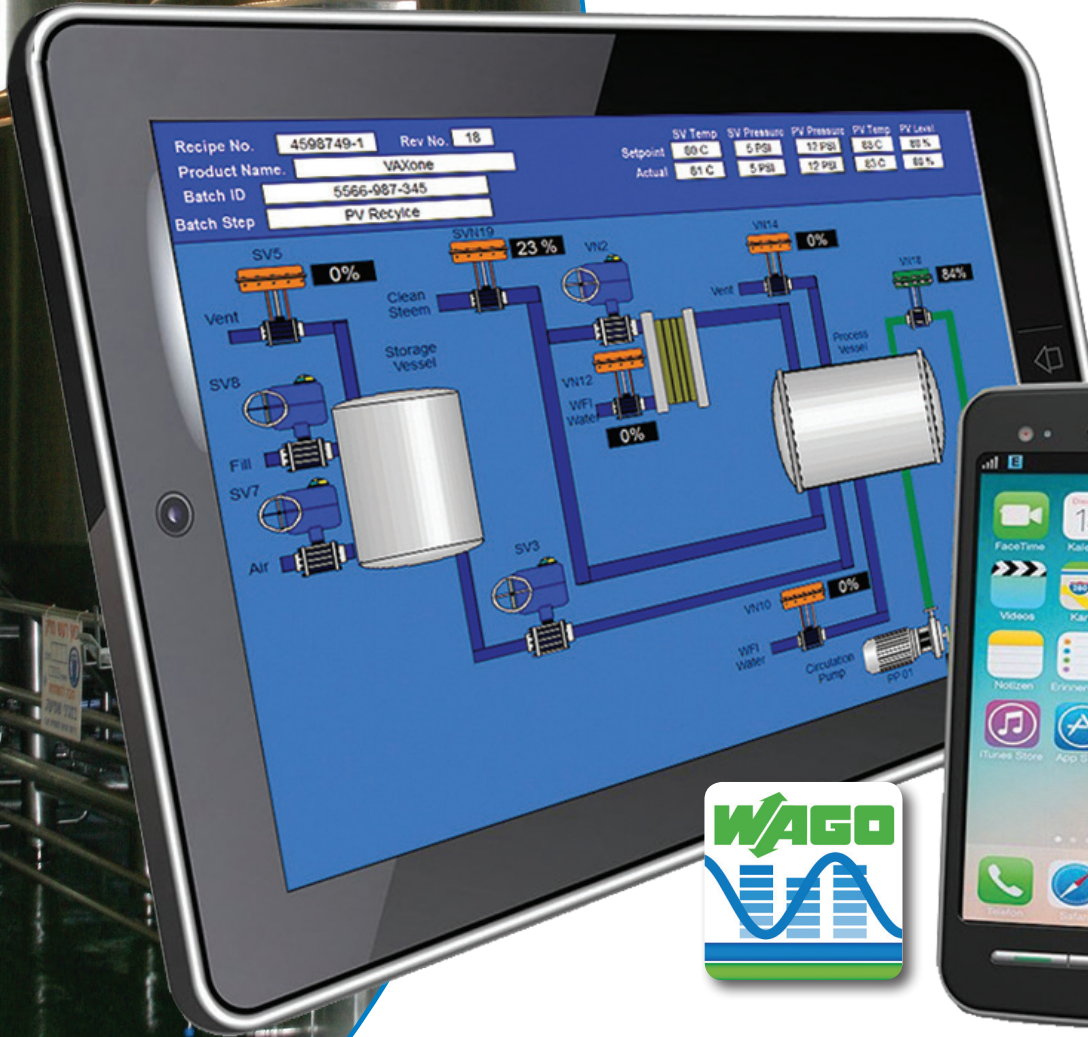

WAGO
®
INNOVATIVE CONNECTIONS

WAGO Corporation's Web Visualization application, the WebVisu App, is a convenient mobile application that enables quick and easy access to equipment status, process data and production levels at the swipe of a finger.
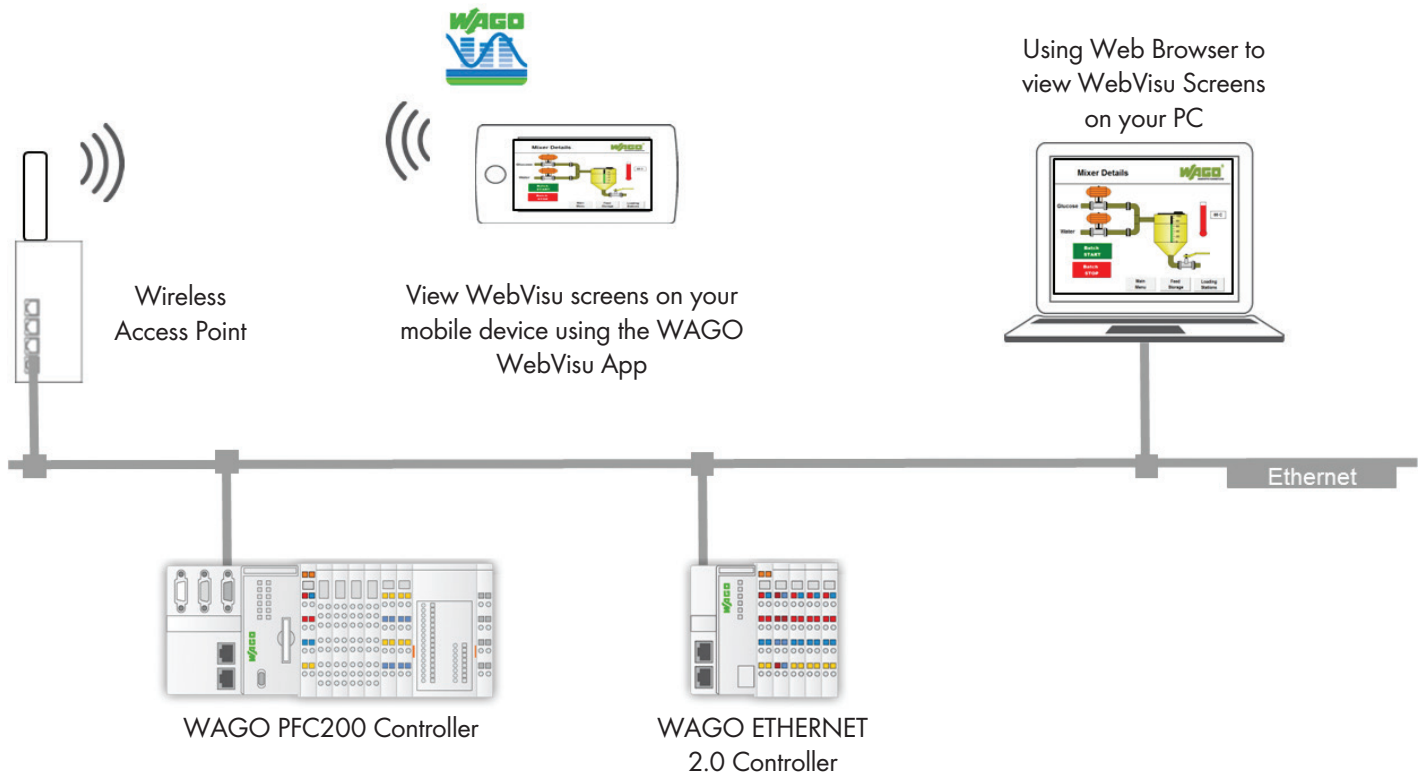

- Access up to 100 controllers on a single mobile device
- Implement on existing WAGO Ethernet Controller applications with no additional cost
- Easy implementation – 1) enter controller name, 2) enter controller URL, 3) click accept
- Supports 750 Series Ethernet Controllers with web-based visualization
- Check system status or take action in ongoing processes directly - on site or on the go
- Visualization screens built with-in WAGO-I/O-PRO (750 Series logic and screen editor)
- Define multiple security levels enabling task-based login strategies

Whether for your plant floor, shipboard or machine automation, the WAGO WebVisu App enables you to monitor and control your operations directly from your smartphone or tablet. The free app is available for both iOS and Android devices via instant download at the Apple App store or Google Play store.

- **Monitor or control from your mobile device**
- **Useful, productive and easy to configure**
- **Can be leveraged in the front office, production floor, engine room or maintenance room**
- **Easy to configure**
- **For use with iOS and Android devices**
- **Free application**

Using Web Browser to view WebVisu Screens on your PC
